## e& PPF Telecom Group and 4iG Explore Strategic Framework for Cooperation in Hungary's Digital Infrastructure

e& PPF Telecom Group B.V. (e& PPF Telecom) today announced that it has signed a non-binding term sheet with 4iG Plc (4iG) regarding a strategic cooperation framework in Hungary that covers both fixed and mobile digital infrastructure.

The term sheet outlines the basis for collaboration that includes:

- A network sharing arrangement between Yettel Hungary and ONE Hungary—operated by e& PPF Telecom Group and 4iG respectively—under CETIN Hungary (operated commercially by e& PPF Telecom), with the intention to assess operational synergies.
- A cash free minority share exchange, where e& PPF Telecom Group and 4iG acquire minority stakes in 2Connect (4iG's fixed infrastructure business) and CETIN Hungary respectively. Any such transaction remains subject to further evaluation and agreement.

This framework builds on the growing cooperation between the companies, underpinned by the recent announcement of a wholesale agreement for fixed broadband services between Yettel Hungary and 2Connect. Under that agreement, 2Connect will provide Yettel Hungary with wholesale broadband access through its gigabit capable fixed infrastructure.

The signed term sheet also offers opportunities to unlock improved network efficiency, broader digital infrastructure exposure, and optional pathways for future collaboration.

Any agreements remain subject to the finalisation of confirmatory due diligence, shareholder approvals, negotiation of definitive documentation, regulatory and corporate approvals, and other customary conditions.

e& PPF Telecom Group will provide market updates should material developments arise.
