FOOD ITALIAN STYLE

Product catalogue

Architects of taste by vocation

We like to think that La Rosa dei gusti is a brand that offers something more than just high quality: we want our products to be unique, memorable experiences.

In our trade, imagination plays an important role, but we think our most distinctive feature is the meticulous planning behind all our products.

Everything else is summed up in the 7 Virtues of La Rosa dei gusti.

The 7 Virtues

**Each and every
La Rosa dei gusti
product has to be:**

Accessible

In a constantly changing world the way we eat changes too, and we are quite certain that La Rosa dei gusti can help with this change by actively showing that quality can be within everyone's reach.

Natural

We don't settle for just carefully and scrupulously selecting everything we need to make our products, but we try to bring out the best of all of Nature's bounty and respect it as much as we can, seeking out the simplicity that is fundamental to our flavours' appeal. Only what is strictly necessary, nothing more.

Sustainable

Since its creation La Rosa dei gusti has pursued a course of action that involves carefully monitoring the production chain and all its participants. This is a very precise goal that is integral to how La Rosa dei gusti products are made.

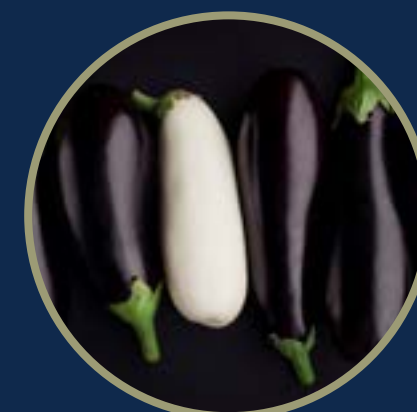

Authentic

We make no pointless alterations to our food and look for totally authentic flavours to give to anyone who wants products that are not only very good, but also healthy and balanced.

Delicious

Transforming food from a mere requirement into an informed choice. We believe we can achieve our ambition by making products that, first of all, are delicious and bring joy.

Distinctive

There are plenty out there who want to be "the best"; we believe it's better to simply try to become "better" and recognisable for our qualities. Some people may like La Rosa dei gusti products more, and some less, but they must always have what it takes to be positively distinctive.
