

Injury procedures - during school hours

If a learner is injured and needs help, he/she can contact any staff member at the school during school hours.

All employees at NIS/NGG have undergone a first aid course in 2022 and there is access to defibrillators at the school.

Secretaries in the administration offices can deal with minor injuries. They assess whether contact should be made to parents.

In case of serious injuries, the school will contact 112 and parents are informed immediately.
