

# HOW CAN SCIENCE? HELP YOUR CAREER?

## Makes you a better communicator

Science will teach you how to convey important information without using too many words, helping you to communicate more effectively.

## Develops problem-solving skills

You'll learn to identify and articulate problems, select variables that may affect the outcome and methodically test solutions.

## Teaches you how to handle data

Your science studies will teach you how to use, interpret and evaluate data, which is a very important skill in a number of jobs.

## Makes you a critical thinker

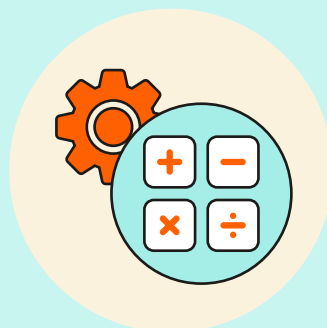

Science will teach you to critically evaluate information, question assumptions and make your own judgements based on the evidence.

## Makes you a great team player

Science will teach you to work in a team and take on individual responsibility to help your team achieve goals set.

## Develops IT skills and numeracy

Science will give you plenty of opportunities to develop your maths and IT skills, which are essential in today's job market.

## Develops time management skills

You'll need to manage your time to manage practical tasks and written coursework, and this is an important skill for any job.

## Makes you more methodical

Science requires you to take a methodical approach to solving problems and this will make you stand out as a candidate for many jobs.

## Makes you more decisive

Your science studies will teach you to collect and analyse evidence, allowing you to make confident, informed decisions.

## Can earn you a higher salary!

Because all of these are sought-after skills and attributes, your decision to study science could help you to earn a higher salary!
