How Novier Uses AI

At Novier, we use AI-based tools in certain contexts to support research, text editing, content development, and the creation and enhancement of images and videos.

As a result, some texts, images, illustrations, and videos on this website may have been wholly or partially created or processed using AI.

All content is reviewed, quality assured, and approved by our employees prior to publication. AI is used as a support tool in our workflows and does not replace human responsibility, judgment, or expertise.

We are committed to openness and transparency in our use of AI and comply with applicable legislation and relevant guidelines.

If you have any questions, please feel free to contact us:
