## UPDATED CORONAVIRUS INFORMATION LETTER

Dear Valued Customer,

The recent development related to the spread of the coronavirus globally has been cooled down, but Sajas Group is in regular contact with authorities and partners in order to have the most recent information of the situation. So far we haven't faced any brush supply chain issues from our partners and our supply operations are running normally. We have still in force our internal travel and safety measures to mitigate potential impact on Sajas Group personnel and our partners.

Sajas Group's customer service has been working normal way all the time.

Our all factories are running all the time with full speed at this moment to make as many products ready for delivery. Even there are some limitations for travelling, we don't have any problems to organize delivery of the goods.

***We do encourage our customers to take steps accordingly and place orders earlier before summer holidays, and if possible increase order quantity to build further security in supply chain.***

In a case of any questions please contact your local sales representative.

Thank you for your understanding and continuous support.

Ylöjärvi, Finland 25<sup>th</sup> of May 2020

Seppo Koskinen
