

From the Hands

of the Örsjö Family

Handcrafted Lighting from Småland

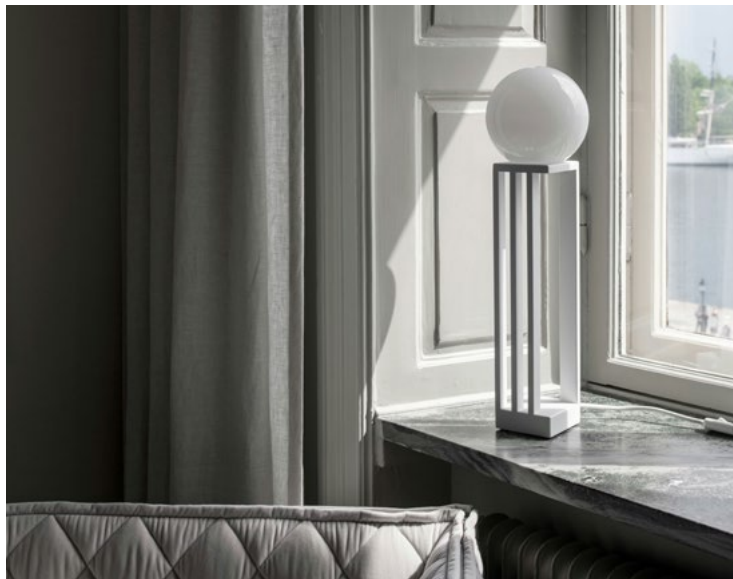

Örsjö Belysning is a family-owned company with in-house production at our factory in Nybro, Sweden. With a focus on quality, professional pride, and craftsmanship, we create timeless lighting using honest materials. Each fixture is carefully made by skilled artisans and carries a unique character shaped by care and craftsmanship.

Timeless Design

Our luminaires are created with a deep commitment to timeless design and uncompromising quality – made to endure for generations. A legacy we have proudly upheld and refined for more than 80 years.

By Some of Sweden's Leading Designers

We collaborate with many of Sweden's foremost designers and artisans – a thoughtful blend of emerging and established creatives, where distinctive expression, personality, and artistic integrity are valued as highly as function, innovation, and sustainability.

Sustainably Made

For us, sustainability is a promise, not a trend. With local production in sustainable materials and by keeping our suppliers close, our processes are as resource-efficient as possible. Through upcycling, we give new life to production offcuts, and what cannot become new products is recycled directly. Quite simply, we have made a promise to ourselves to leave the smallest possible footprint on our planet.

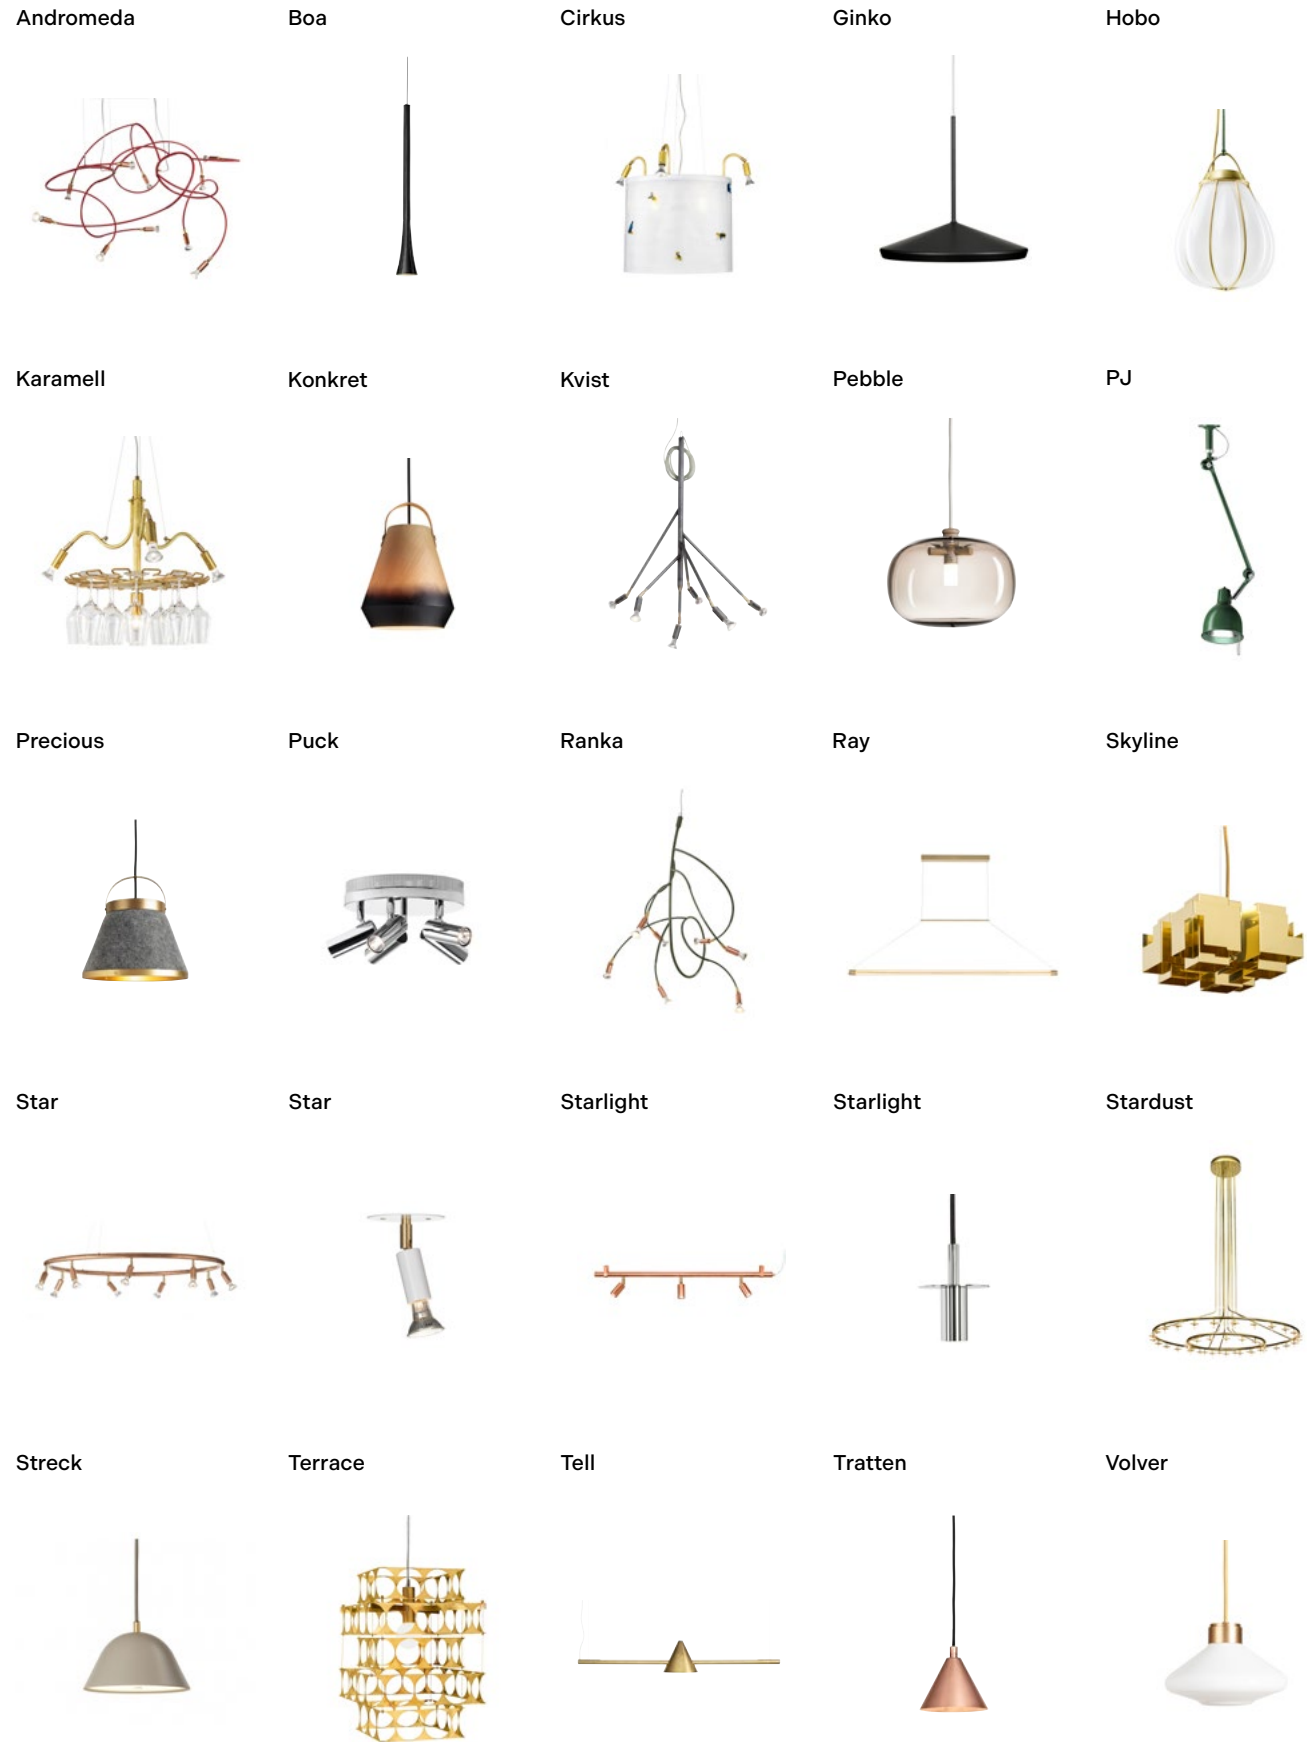

Carefully Tailored to Your Needs

With extensive experience, in-house production, and significant capacity, we deliver solutions that bring our clients' visions to life – from customized standard pieces to fully bespoke luminaires. Working closely with architects and designers, we welcome projects of all scales. We invite you to challenge us with your ideas.
