

Take A Peek Inside “Botched” Star Dr. Paul Nassif’s New Beverly Hills MedSpa

BY LAURA SCHREFFLER | NEWS | MARCH 23, 2018

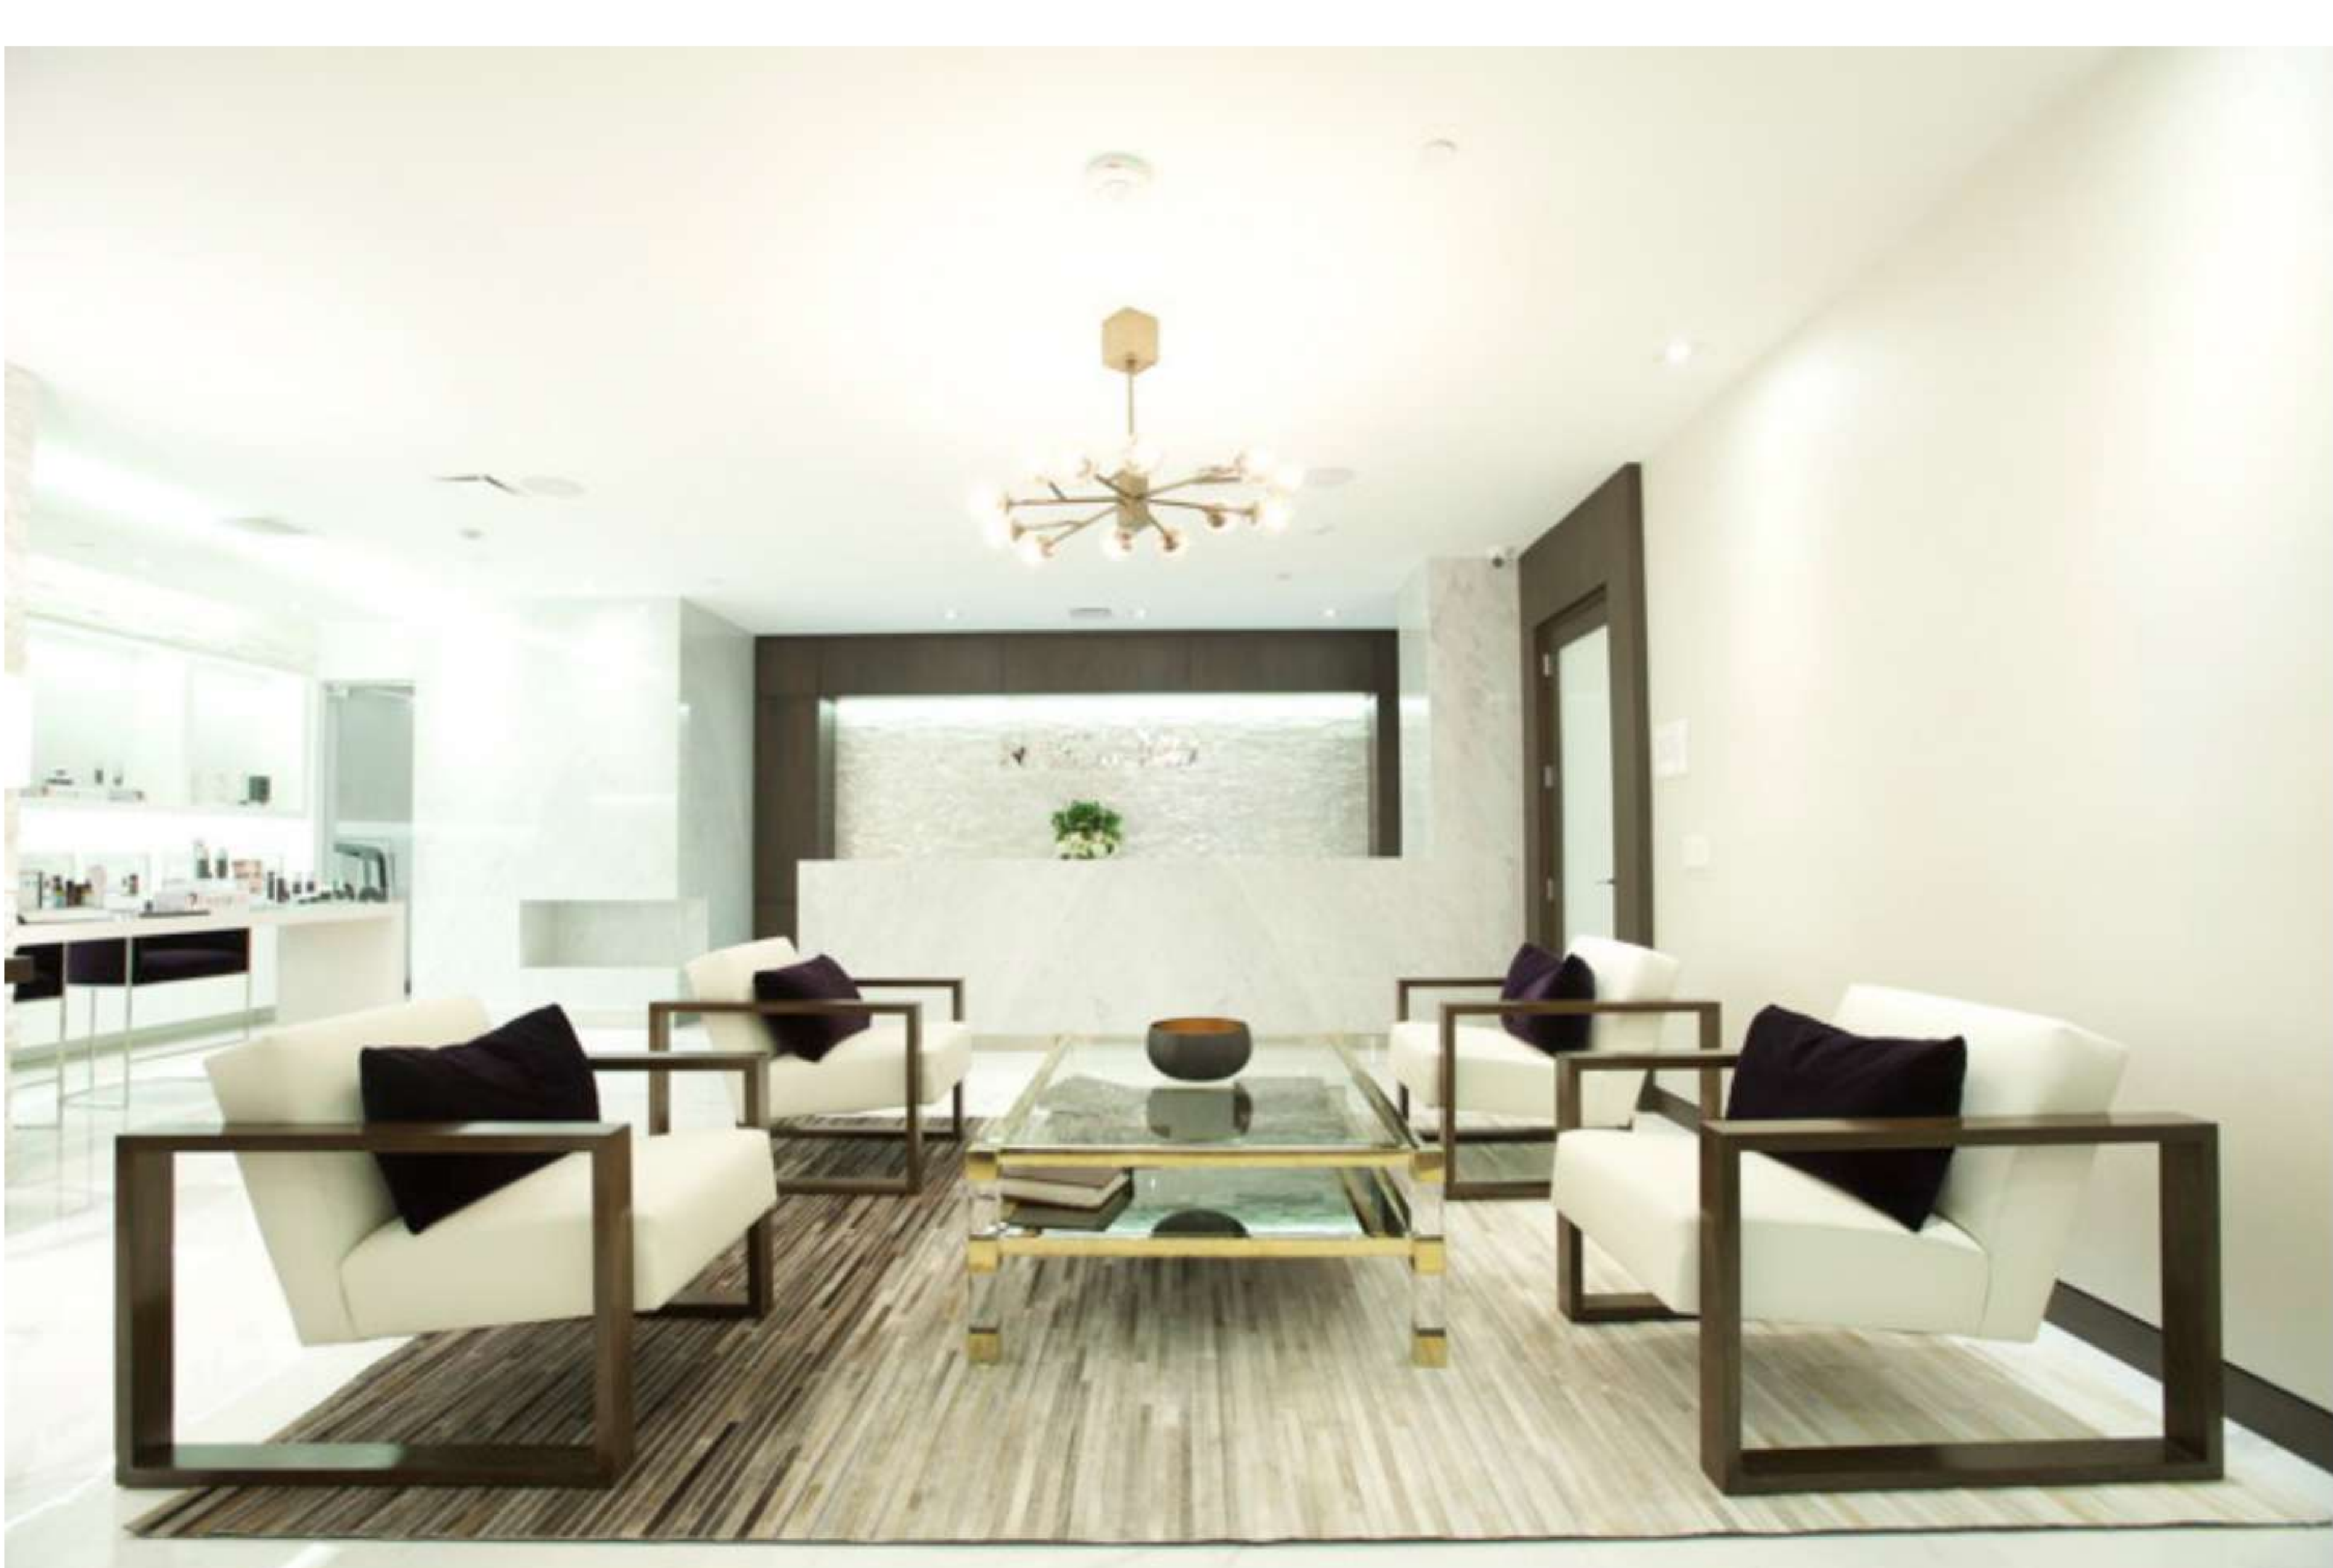

Dr. Paul Nassif

If rhinoplasty isn't in the cards but you still want to experience the magic hands of Dr. Paul Nassif —plastic surgeon extraordinaire and star of the hit E! series, “[Botched](#),” you need only book an appointment at his brand new Beverly Hills medspa.

At close to 4,500 square feet, NassifMD Medspa offers nine treatments rooms, staffed by a surgeon, nurse and clinical aestheticians. Its menu of medspa services is extensive. Services include Botox the gold standard in wrinkle reduction; [Coolsculpting](#), a way of freezing fat; Neograft, cutting-edge hair transplants; and Sculptra. Radiofrequency treatments on offer include Skinfinity, Thermismooth and ThermiTight, a non-surgical procedure that's primarily designed to tighten any loose or sagging skin around your body; the advanced LightStim LED Bed, a natural, non-invasive light therapy that stimulates the body's ability to build new proteins and regenerate cells.

In addition to LED facial treatments, among its aesthetician services for diverse skin types and ethnicities, NassifMD Medspa offers Hydrafacial treatments, mild peel options such as Purity Clean and Sensi Peel, and more robust peels such as Beta Lift, Rejuvenation, PCA Peel with Hydroquinone, and Ultra Peel. Vitamin shots and vitamin/mineral IV therapy are also offered, whether for beauty, rejuvenation, chronic fatigue or surgery prep/recovery.

Nassif, also a former star of E!'s “[The Real Housewives of Beverly Hills](#),” also carries his own skincare line, [Bio-Clock Dermaceuticals](#), at the spa. The products were created with the concept of biorhythm in mind. A biorhythm is a 24-hour cycle or pattern that the body undergoes, shifting between day and night. Nassif's specially formulated skin care products respond to the skin's natural cyclical changes throughout the day by providing exactly the nutrients your skin needs, when it needs them. If you are tired or stressed, travel a lot for work, spend too much time on the computer, or are simply a part of today's busy consumer culture, Dr. Nassif's skin care products can help keep your skin hydrated and nourished to protect it from the early aging effects that asynchronous biorhythms can cause.

The NassifMD medspa is located within NassifMD at 120 South Spalding Drive
