Heather, RN BSN CANS Injector(Below)

Ariel says that “Dr. Beck’s dedication to his patients before and after surgery is exceptional. He goes above and beyond the call of duty to ensure patient safety. From hiring highly experienced staff to purchasing state-of-the-art equipment, Dr. Beck makes sure you are in the best hands possible.”

Because Beck Aesthetic Surgery strives to exceed expectations, they have perfected the patient experience. From their expert injector, to their caring estheticians, to Dr. Beck himself, a thoroughly compiled plan will be constructed for achieving the best version of yourself. They believe that feeling good about yourself at any stage of life is something we all deserve.

The best care will soon be even more impressive as Beck Aesthetic Surgery moves this fall to an 11,000-square-foot new building in the Waverly/Rea Farms area. The new office will include an ambulatory surgery center with two operating rooms and two overnight suites for post-operative monitoring.

The new building will also house a state-of-the-art Med Spa and include dedicated aesthetic and laser rooms.
