It's been said that youth is wasted on the young. Whether true or not, it's an adage that gets tossed around jokingly even while it hits close to the mark. If only we appreciated the skin (or the physique) we had in our 20s, when we were in our 20s. The good news is that advancements in cosmetic surgery and laser technology now allow us to take a few years off our appearance, if we so choose. At Beck Aesthetic Surgery, Dr. Joel Beck will help you understand all your options.

Dr. Beck is a board-certified plastic surgeon and owner of Beck Aesthetic Surgery. He completed his surgical residency at the University of California and then went on to complete a fellowship in both burn surgery and plastic and reconstructive surgery. "I've always been very meticulous, and always liked to use my hands," Dr. Beck explains. "What made me want to become board certified in plastic surgery was the natural evolution after becoming a plastic surgeon. I wanted to be the best in my field." After practicing for 18 years in California, Dr. Beck opted for a change of scenery and moved to Charlotte. "I've had family here for many years and I've always loved the Carolinas and its beauty."

In 2019, Beck Aesthetic Surgery opened in Matthews, offering a variety of surgical and non-surgical procedures.

Dr. Beck specializes in facial procedures such as deep plane facelifts, neck lifts, rhinoplasty, brow lifts, eyelid surgery and regenerative fat grafting. He is also proficient in body procedures such as tummy tucks, liposuction, breast augmentation, breast lift/reductions, mommy makeovers and Brazilian buttock augmentations (BBL). His most requested procedures are mommy makeovers, deep plane facelifts and BBL.

After four years of searching for a highly skilled injector to join the team, Dr. Beck hired Heather Rypien (RN, BSN, CANS) to handle the injectables – Botox, Restylane and Sculptura, to name a few. They are popular and highly in demand at Beck Aesthetic Surgery due to Heather's expertise and care. "Having been a flight attendant for 14 years and then a nurse, I love people, caring for people and I'm passionate about patient relationships," she says. Heather is one of the top injectors in the country and, in fact, travels around the country as a Galderma trainer when she's not delighting patients with beautiful results at Beck Aesthetic Surgery. Heather has a unique ability to bond with her patients, finding common ground with them and remembering their preferences from visit to visit.

Dr. Beck is equally devoted to his patients and their outcomes. Staff member
