Installation Instructions for Indoor Daily Timer

SETTING ON/OFF PERIODS
Timer can set up to 48 On/Off commands a day. Using your finger, pen or screwdriver, pull up all pins that correspond to time. For desired' On" time make sure pins are pushed down. Each pin represents 30 minutes: 2 pins = 1 hour.

SETTING TIME
Turn dial clockwise until triangular pointer is pointing at actual time. Be sure switch on top of unit is set to **TIMER ON**.

CONNECTION
Once desired ON/OFF time and actual time are set, plug timer into wall outlet and plug device into timer. Be sure wall outlet and device are turned on. Timer will start to operate, turning device ON/OFF according to pre-installation.
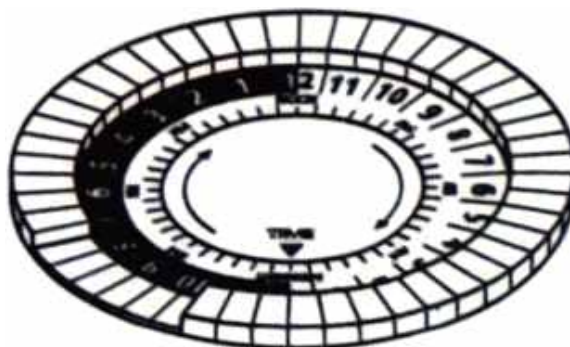

MANUAL ON/OFF
Represents timer that will come on at 7PM and shut off at 10PM. Pre-set On/Off commands can be interrupted by using manual override switch located on top of unit When switched to OUTLET ON connected device is switched on permanently To reactivate timer's control of device, turn device switch on and set timer's override switch to TIMER ON. In case of power failure, reset timer as explained above.

RATING:
125V~, 60Hz
15A, 1875W Resistive
10A, 1250W Tungsten

Represents timer that will come on at 7PM and shut down at 10PM
