1. IMPORTANT REMARK

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated “dangerous voltage” within the product’s enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

**WARNING (If applicable):** The terminals marked with symbol of “⚡️” may be of sufficient magnitude to constitute a risk of electric shock. The external wiring connected to the terminals requires installation by an instructed person or the use of ready-made leads or cords.

**WARNING:** To prevent fire or shock hazard, do not expose this equipment to rain or moisture.

**WARNING:** An apparatus with Class I construction shall be connected to a mains socket-outlet with a protective earthing connection.
2. IMPORTANT SAFETY INSTRUCTIONS

1. Read these instructions.
2. Keep these instructions.
3. Heed all warnings.
4. Follow all instructions.
5. Do not use this apparatus near water.
6. Clean only with dry cloth.
7. Do not block any ventilation openings. Install in accordance with the manufacturer’s instructions.
8. Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.

9. Do not defeat the safety purpose of the polarized or grounding type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.

10. Protect the power cord from being walked on or pinched particularly at the plugs, convenience receptacles, and at the point where they exit from the apparatus.

11. Only use attachments/accessories specified by the manufacturer.

12. Unplug the apparatus during lightning sorts or when unused for long periods of time.

13. Refer all servicing to qualified personnel. Servicing is required when the apparatus has been damaged in any way, such as power supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.

14. Disconnecting from mains: When switching off the POWER switch, all the functions and light indicators of the unit will be stopped, but fully disconnecting the device from mains is done by unplugging the power cable from the mains input socket. For this reason, it always shall remain easily accessible.

15. Equipment is connected to a socket-outlet with earthing connection by means of a power cord.

16. The marking information is located at the bottom of the unit.

17. The apparatus shall not be exposed to dripping or splashing and that no objects filled with liquids, such as vases, shall be placed on apparatus.

WARNING: This product must not be discarded, under any circumstance, as unsorted urban waste. Take to the nearest electrical and electronic waste treatment centre.
3. IMPORTANT NOTE

Thank you for choosing our Ecler DROP6 pendant loudspeaker!

It is VERY IMPORTANT to carefully read this manual and to fully understand its contents before any connection in order to maximize your use and get the best performance from this equipment.

To ensure optimal operation of this device, we strongly recommend that its maintenance be carried out by our authorised Technical Services.

Ecler DROP6 comes with a 3-year warranty.

4. INTRODUCCION

DROP6 is a 6.5" 75W @ 8Ω 2-way pendant loudspeaker with a sleek design, featuring a 70/100V line transformer with 60/30/15 and 7.5W power selections, available in high and low impedance levels.

5. TECHNICAL FEATURES

- Two-way full-range pendant loudspeaker
- 75 W RMS @ 8 Ω
- 6.5" woofer / 1" tweeter.
- Compatible for use in high impedance (70V or 100V line) and low impedance (8Ω)
- Power selector: 4 options of 60W/30W/15W/7.5W in high impedance or one 75W option in low impedance
- ABS reinforced with fibreglass
- Paintable grille and speaker (white)
- INPUT/LINK double connector, Euroblock type
- Cable length: 5m (includes 2 height adjustable steel cords)
- Available in white (RAL9003) and black (RAL9005)
6. CONNECTIONS

The DROP6 connection is of the Euroblock type, to be connected directly to the wiring line coming from the power amplifier. The power selector located on the top of the loudspeaker allows you to select the mode and power of the unit by means of a switch:

- 75 WRMS @ 8Ω
- 60/30/15 and 7.5W @ 70/100V

The DROP6 loudspeaker is delivered from the factory with the switch in the 60W position (70/100V). If accidentally connected to a low impedance amplifier (8Ω), it will not cause any damage to the loudspeaker, but it will under perform.

**WARNING:** If the loudspeaker is accidentally connected to a 70/100V mains grid in position 8Ω, the amplifier and loudspeaker will be seriously damaged.
7. LOCATION AND MOUNTING

Each DROP6 unit contains 2 steel cords for suspension of the 5 metre unit, plus 2 Euroblock connections.

**WARNING:** Make sure that both the ceiling and the mounting system are sturdy enough to support the weight of the loudspeaker.

To install each unit, the following instructions must be followed:

1. Insert the steel cords and fasten them to the bracket and to the desired height.
2. Remove the top of the speaker enclosure to expose the connection panel

3. Feed the included steel cords and wiring line from the amplifier through the conical rear cover
4. Hook the steel cable to the metal part of the speaker
5. Hook the second steel cord in the same way and pass the line cable through the hole to reach the Euroblock connectors. Select the power you want the speaker to operate at.
6. Position the conical back cover and rotate it until the locking marks match up
