1. Plug in CORE transmitter

![Image](Image 1)

Connect the transmitter DC adapter to the electrical outlet and use one of the 3 available audio inputs to connect the music source.

2. Hangs GLOBE from the ceiling

![Image](Image 2)

Check whether the unit is really powered or not by watching the LED indicators. If blue and green LEDs start blinking the unit is ready to pair.

3. Power ON GLOBE

![Image](Image 3)

4. Pair the devices

Make a short press on the WiS PAIR key (using a clip e.g.), the WiS and RX LEDs will start to blink.

When the CORE and GLOBE lights stop blinking, the devices are paired.

5. Select the input and play the music!

![Image](Image 4)

Use WiSpeak grip app for set up and control functions.
