1. PRECAUTIONS

1.1 Important Notice

WARNING: SHOCK HAZARD - DO NOT OPEN

AVIS: RISQUE DE CHOC ÉLECTRIQUE - NE PAS OUVRIR

The flashing light with an arrowhead symbol inside an equilateral triangle on it is intended to alert the user of the presence of non-insulated “dangerous voltage” within the enclosure, which might be of sufficient magnitude to pose a risk of electric shock to users.

The exclamation mark within an equilateral triangle is intended to alert the user of the requirement for important operating and maintenance (servicing), for which instructions may be found in the literature accompanying the appliance.

WARNING (If applicable): Terminals marked with symbol “” may be of sufficient magnitude to pose a risk of electric shock. The external wiring connected to terminals requires installation by a technician, or the use of ready-made leads or cords.

WARNING: To prevent fire or shock hazard, do not expose this equipment to rain or humidity.

WARNING: A device with Class I manufacturing ought to be connected to a mains socket outlet with a protective earthing connection.

WARNING: Ecler products have a long lifetime of more than 10 years. This product must never be discarded as unsorted urban waste, but must be taken to the nearest electrical and electronic waste treatment centre.

1.2 Key Safety Directions

1. Read the following directions.
2. Keep the following directions.
3. Observe all warnings.
4. Follow all instructions.
5. Do not use this device in proximity to water.
6. Clean only with a dry cloth.
7. Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
8. Do not install near any heat sources such as radiators, heat registers, stoves, or other devices (including amplifiers) that may release heat.
9. Do not defeat the safety purpose of the polarized or grounding type plug. A polarized plug has two blades, with one being wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, contact a qualified electrician for a replacement of the obsolete outlet.
10. Protect the power cord from being walked on or pinched, particularly at the plugs, convenience receptacles, and at the point of exit from the device.
11. Only use attachments/accessories specified by the manufacturer.
12. Unplug the device during lightning storms or when unused for long periods.
13. Refer all servicing to qualified personnel. Servicing is required when the device has been damaged in any way, such as power supply cord or plug damage, liquid spillage or objects onto the device, the device has been exposed to rain or humidity, does not operate normally, or has been dropped.
14. Disconnecting from mains: When switching off the POWER switch, all the functions and light indicators of the unit will be stopped, but fully disconnecting the device from mains is done by unplugging the power cable from the mains input socket, therefore, it should always remain easily accessible
15. Equipment is connected to a socket-outlet with an earthing connection by means of a power cord.
16. The marking information is located at the top/rear of the unit.
17. The device shall not be exposed to dripping or splashing liquids, and no liquid-filled objects, such as a filled up glass, shall be placed on top of the device.

1.3 Cleaning Directions

Clean the unit with a soft, dry clean cloth or slightly wet with water and neutral liquid soap only, then dry it with a clean cloth. Be careful that water never gets into the unit through any hole. Never use alcohol, benzine, solvents or abrasive substances to clean this unit.

NEEC AUDIO BARCELONA, S.L. accepts no liability for any damage that may be caused to people, animal, or objects due to failure to comply with the warnings above.

4. DESCRIPTION & FEATURES

VEO-SPS44 is an 18Gbps HDMI® 1×4 splitter that allows an HDMI® source signal to be distributed and extended to four remote displays, supporting up to 4K 60Hz 4:4:4 video signals. It includes an HDMI® loop output and four main single Cat outputs, allowing for transmission distances of up to 35 meters for 4K/60Hz, 50 meters for 4K/30Hz, or 70 meters for Full HD over a single Cat 5e or higher cable. In addition, it supports one-way IR control signal pass-through, stereo unbalanced audio extraction on Euroblock connector, EDID management, and RS-232 serial control, making it a reliable and versatile solution for professional video distribution applications.

4.1 Main Features

- Signal distribution and extension over a single Cat 5e or higher cable.
- Support for HDMI® 18Gbps 4K 60Hz 4:4:4 as specified in HDMI® 2.0b.
- Transmission distance for 4K/60Hz up to 35 meters, 4K/30Hz up to 50m and 1080p /60Hz up to 70m.
- Stereo unbalanced audio extraction via Euroblock connectors.
- Includes an HDMI® Loop Out and four RJ-45 extension outputs.
- Support for HDR10, HDR10+, Dolby Vision, and HLG video signals.
- Support for audio formats LPCM 2.0, LPCM 2.0, Dolby Digital/Plus/EX, Dolby True HD, DTS, DTS-EX, DTS-96/24, DTS High Res, DTS-HD Master Audio, DSD.
- EDID Management.
- HDCP 2.2 compliant.
- IR control extension.
- Support for RS-232 remote control.
- PoC function for the included receivers.

5. PANEL FUNCTIONS

5.1 VEO-SPS44 (Splitter TX)

5.1.1 Front & Side Panel

1. **Power LED:** When the device is powered on, the green power LED will be on.
2. **IN LED:** When the HDMI IN port connects an active source device, the green LED will be on.
3. **LOOP LED:** When the HDMI LOOP OUT port connects an active display device, the green LED will be on.
4. **OUT LED [1-4]:** When the CAT OUTPUT 1-4 port connects the CAT IN port of CAT receiver, the corresponding white OUT LED will be on.
5. **EDID Switch:** Used to set EDID mode. [Please refer to EDID Mode section for further details.](#)
6. **SERVICE:** Micro-USB used for firmware upgrade or serial port command control. [Please refer to ASCII Commands section for further detail for details.](#)

5.1.2 Rear Panel

1. **AUDIO OUT:** Stereo unbalanced audio extraction.
2. **IN:** HDMI® input connector.
3. **LOOP OUT:** HDMI® loop out connector.
4. **CAT OUT [1-4]:** Connect it to the VEO-SPS4 receiver input port using a Cat 5e or higher cable. Only point-to-point connections are allowed.
5. **IR OUT:** 3.5mm jack to connect to the IR Blaster for extending an IR signal from the display to the source.
6. **DC 12V:** Power input for 12V DC supply.

5.2 VEO-SPS4 (Receiver RX)

5.2.1 Front & Rear Panel

1. **CAT IN:** Port for connecting to the VEO-SPS44 splitter output using a Cat 5e or higher cable. Only point-to-point connections are supported.
2. **SERVICE:** Micro-USB used for firmware upgrade or serial port command control. [Please refer to ASCII Commands section for further details.](#)
3. **IR IN:** Input for the included IR receiver, allowing IR signal extension from the display to the source device.
4. **DC 12V:** Power input for 12V DC supply.
5. **OUT:** HDMI® output for connection to the display (e.g. 4K TV).

6. INSTALL & CONNECT

! Good quality standard Ethernet Cat 5e cables (or higher) are required to connect splitter and receiver in order to avoid connection issues and malfunctioning. **Shielded cables and shielded connectors are mandatory to ensure a good ground signal reference to the receiver and avoid electromagnetic interferences along the cable.**

! Please insert/extract the HDMI® cables gently.

1. **HDMI® signal sources** such as Blu-Ray Player, STB, etc: connect devices to the HDMI® input of VEO-SPS44.
2. **HDMI® Display devices** such as a 4K or 1080p display or projector: connect devices to the HDMI® port of VEO-SPS4 receiver or and the HDMI® loop out port of the VEO-SPS44.
3. **IR Blaster**: connect it to the IR-Out port of VEO-SPS44 splitter.
4. **IR Receiver**: connect it to the IR-In port of VEO-SPS4 receiver.

5. **Amplifiers or Audio devices:** connect to Audio ports of VEO-SPS44 splitter.
6. **Split & extend - CAT output ports 1~4:** connect Cat 5e+ cables from each RJ-45 output of the VEO-SPS44 splitter to the RJ-45 input of each VEO-SPS4 receiver to distribute the HDMI® signal and enable signal transmission.
7. **Power on:** connect the 12VDC power supply to the VEO-SPS44 splitter or VEO-SPS4 receiver.

Each receiver can be powered either via its power adapter or through PoC (Power over Cable) from the splitter. Only one method is required.

7.2 ASCII Commands

ASCII command control is supported via the SERVICE port. When connected to a PC using a micro-USB cable, a serial command tool can be used to send ASCII commands. The following tables provide a summary of all supported commands, including their functions, expected feedback, and default settings.

The communication settings must be configured as follows:

- Baud rate: 115200 (default)
- Data bits: 8bit
- Stop bits: 1
- Check bit: 0

Each command consists of a structure with specific delimiters and parameters, as described below:

- [y] - Parameter 1
- [z] - Parameter 2
- ! - Delimiter (all commands must end with '!')

The command set includes functions to control power, retrieve device information, configure video and audio outputs, manage EDID settings, and more. The following tables provide a comprehensive list of available commands grouped by functionality.

EXAMPLE OF USE:

To enable HDCP on CAT output 1: < s cat [y] hdcp [z]! >

- y=1 defines the CAT output port 1
- z=1 enables HDCP

The command to use is: < s cat 1 hdcp 1! >

This command activates HDCP on CAT output 1.

To disable HDCP for all CAT outputs, the user should use: < s cat 0 hdcp 0! >
