

PCS124

LOUDSPEAKER HARDWARE

Pendant Cluster Mounting Kit

PRODUCT OVERVIEW

PCS124 is a kit to convert an eMOTUS, AUDEO or TRAIL103 individual unit into a pendant cluster. It offers the possibility to combine from 1 to 4 of these units, cluster and hang them from the ceiling. PCS124 is supported by a hollow bar, which allows passing through all the wires for an easy and fast installation, besides an optimal adjustment and an elegant finish. This kit is designed for indoor and outdoor installations, and it's available in black and white colours.
