Channel Manager

Peakwork Channel Manager Solution powered by Juniper

All bookings are managed by the Juniper Booking Engine.

The Hosted Contracts Module, which covers one sales channel and one currency, enables the management and distribution of accommodation products contracted directly with the provider.

The Extranet Module can be offered to hoteliers by granting permissions to easily update prices, allotments, descriptions and photos, as well as connections to channel managers.

✔ EDF Push Service

✔ Setup & Configuration of Peakworks B-HUB

✔ Hotelmapping for Booking Engine & Peakwork hotel database

✔ Backoffice Webservice to manage hotel portfolio via API (automated processes possible)

✔ Bookings Export Function

✔ Professional Online Training of Booking Engine

✔ Integrator & Service Support

60+ Integrations   **250K+ Hotels**

About Peakwork:

Founded in 2009, Peakwork GmbH is the dynamic packaging and distribution software specialist for the travel industry. With its globally unique Player Hub technology, Peakwork has created a dynamic production and distribution network for the travel industry that connects global supply and demand.

Leading international tour operators and service providers rely on Peakwork solutions with connections to global hotel and flight providers for dynamic travel production. The technology for flexible and internationally scalable travel distribution is designed for massive traffic and benefits, in particular from the connection to global meta searchers and distribution networks.

A pioneer of traveltech decentralization and access to numerous enterprise-scale travel market players, Peakwork is the first mover and leading provider for blockchain-based Web3 applications for the travel industry.

In around 50 markets worldwide, travelers can search and book their dream vacation on the Player Hub network, including the next level of Web3 travel technology.
