Since 2016, our Office, Retail and AUP Bratislava sub-funds have consistently delivered impressive returns. Our portfolio boasts 16 properties strategically located across the capital cities of Czech Republic, Slovakia, and Poland. Building on the success of these sub-funds, we now present our newest real estate venture: WOOD & Co. Logistics Sub-Fund.

Recognising the vast potential and dynamic growth in the logistics sector, we have chosen to initiate our investments in Poland. Renowned as one of the most active regions in Europe for logistics, Poland is a hub of opportunities. With its strategic location and burgeoning market, it offers a perfect blend of growth potential and stability.

Logistics Sub-Fund's Investment Strategy

The strategy of **WOOD & Co. Logistics Sub-Fund** involves investing in the development of state-of-the-art warehouses in proven locations that comply with the strictest ESG requirements. By forming joint ventures with established developers, we ensure each development is executed with appropriate expertise. The Sub-Fund seeks to enter partnerships with committed developers who are willing to contribute 5 – 20% of the project's equity. This alignment ensures a shared risk and reward mindset and creates a unified goal of achieving optimal success. After the development phase, facilities are leased and subsequently disposed with the aim of maximizing investor returns. The Sub-Fund provides its investors with the opportunity to benefit from the development profit of each investment. Development risks are balanced by the higher target return of 15% p.a. net.

7R Park Tczew III: Continuation of a Success Story

WOOD & Company partnered with 7R, a renowned warehouse developer, providing 15% of the equity and development expertise for 7R Park Tczew III. Strategically located in Tczew near Gdańsk, the project offers direct access to the A1 highway connecting Gdańsk with Łódź and the Czech border.

7R has already successfully developed, leased, and sold two phases of 7R Park Tczew, delivering 97,000 sqm of logistics space. Building on this momentum, 7R and WOOD & Company are now introducing the third phase of the project.

Construction of 7R Park Tczew III is progressing in multiple phases. The first building was completed in Q1 2024 and is now mostly leased to Esa Logistika, a Czech logistics provider with over 30 years of experience and an annual revenue of approximately €190 million.

7R Park Lavičky: A premium project directly on the D1

In January of this year, WOOD & Company entered a project for the development of a logistics-industrial hall in a strategic location directly along the D1 highway, near Jihlava.

On a 6-hectare site with a valid building permit, the project will deliver 25,500 sqm of modern warehouse space meeting the highest industry standards.

Currently, site preparation is underway, and discussions with potential tenants are in progress.

Panattoni Park Pilsen West III: Modern Logistics in a Prime Location

WOOD & Company's Logistics Fund, in collaboration with Panattoni, is pleased to announce the development of the new Panattoni Park Pilsen West III, situated in Úherce, just 14 kilometers west of Pilsen. This modern industrial park will provide 40,000 square meters of leasable space in a well-established, high-demand area, with a total project investment exceeding one billion CZK.

The park's strategic location near the D5 highway (Exit 93) provides excellent transport links between the Czech Republic and Germany, making it an ideal hub for logistics and distribution in Central Europe. The facility has been designed to meet high sustainability standards and is aiming to achieve the BREEAM New Construction certification at an Excellent rating. It will feature advanced energy-efficient technologies, including heat pumps and solar panels, to minimize greenhouse gas emissions and enhance energy independence.

Panattoni is one of the largest privately held development companies in the world. Since commencing operations in Central Europe in 2005, the company has completed nearly 22 million square meters of modern industrial space in the European Union countries and the United Kingdom.

Project Pipeline

Thanks to its strong market position, WOOD & Company has access to a broad range of investment opportunities, which we continuously evaluate with great care.

For 2025, our goal is to expand the subfund's portfolio with 3 new projects, ensuring maximum diversification across selected locations.
