

# The Energy Transition Pathway

Today more than ever we are faced with complex global energy challenges. The NetZero Tube **VIDEO PORTAL** was created to “circulate” and disseminate knowledge on the production of alternative energy through cogeneration, biogas and biomethane/RNG, the fundamental elements for implementing the energy transition.

→ NetZero Tube is the collector of all information in the field of biogas, biomethane/RNG and cogeneration, the international editorial point of reference for technologies which can contribute to achieving the zero net emission goal.

## A triple path towards energy sustainability

NetZero Tube consists of three video channels: Biogas Channel, Biomethane-RNG Channel and Cogeneration Channel. Since 2013, we have collected thousands of experiences and interviews with industry experts and we continue to consult the main authoritative sources on the subject to help disseminate correct and up-to-date knowledge about the world of biogas, biomethane/RNG and energy efficiency.

# Biogas channel

## Testimonials and insights on biogas and its applications

- ▶ Since 2013
- ▶ + 1,700 videos
- ▶ + 20,000 followers

# Biomethane RNG channel

## All the information on the world of biomethane or renewable natural gas

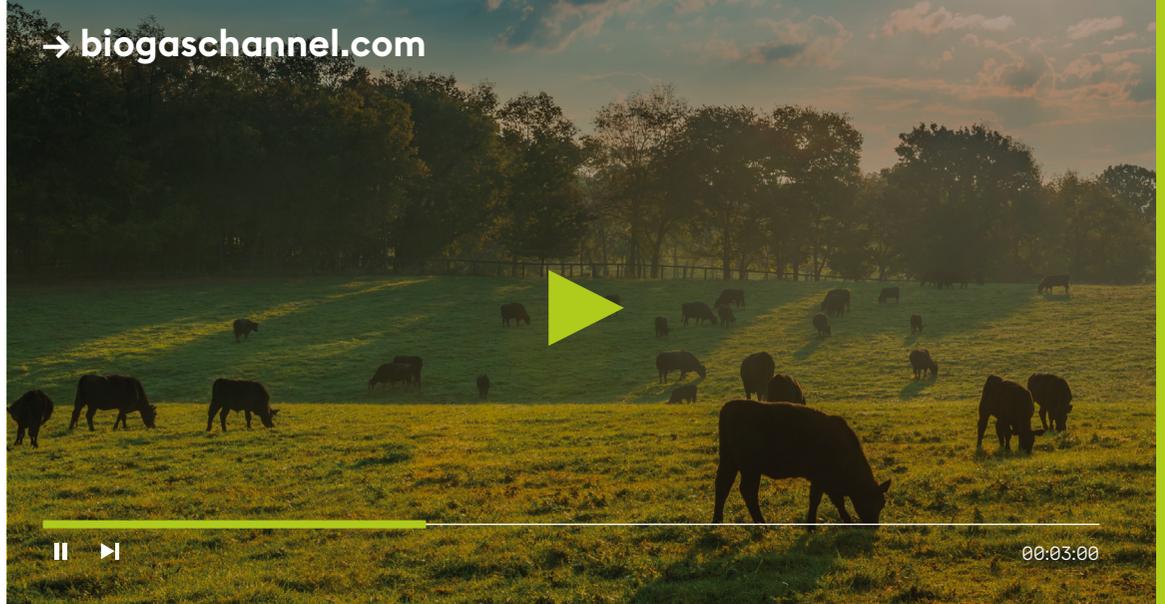

- ▶ Since 2022
- ▶ + 200 videos
- ▶ From the ten-year experience of Biogas Channel

# Cogeneration channel

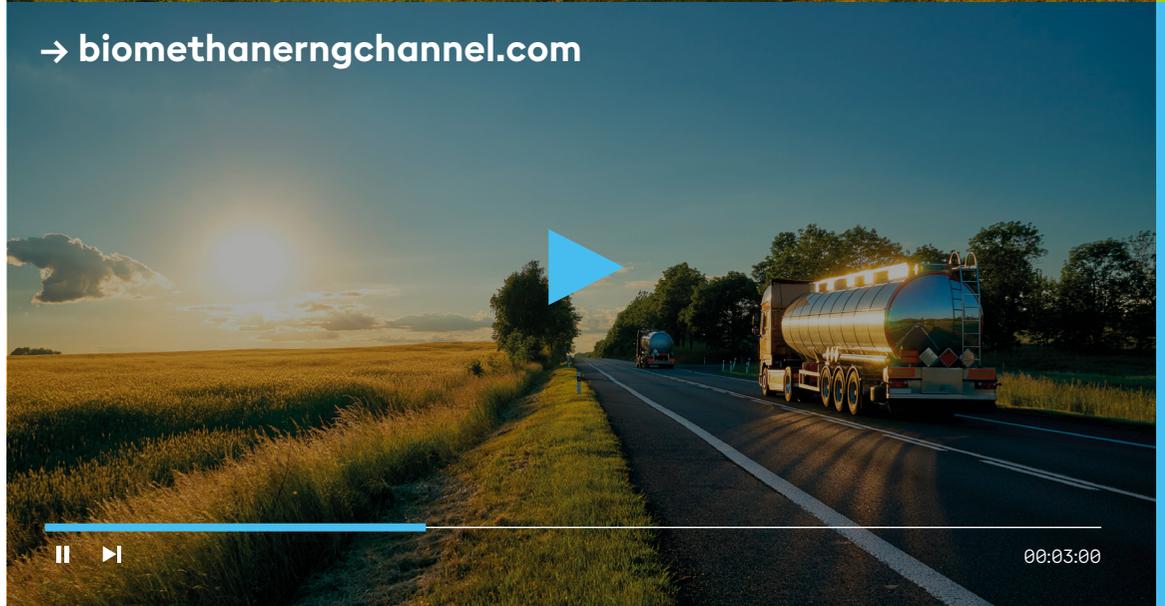

## The world of cogeneration for energy efficiency

- ▶ Since 2014
- ▶ + 1,000 videos
- ▶ + 6,000 followers
