## FOR IMMEDIATE RELEASE

### NuMed - Evexia Partnership Announcement

The NuMed Collective (NuMed) is a non-profit that represents hundreds of Board-Certified Nutrition Specialists® who work with thousands of clients and physicians across the country to create a holistic and integrative healthcare model that optimizes wellness through nutrition medicine by identifying the root cause of chronic illness and disease.

NuMed is establishing nutrition as the foundation of medicine through the integration of Board-Certified Nutrition Specialists (CNS®s) and other qualified healthcare practitioners from which care and treatment of patients can be built to fortify the overall health of our communities, reduce chronic disease, and decrease overall economic burden.

NuMed partners with various health, nutrition, and science-based organizations (like Evexia) to provide their members with high quality products and services.

#### CLIENTS & PATIENTS:

NuMed can connect you with highly trained, local or telehealth providing CNS®s who specialize in your specific health concerns and can personalize a nutrition plan with dietary, nutrient, and lifestyle recommendations. In addition, working together with your current health practitioners, a CNS® can add crucial nutrition guidance and help you achieve your health and wellness goals.

#### CNS®s & STUDENTS:

NuMed can connect you with clients and medical professionals looking to add a CNS® to their team. Opportunities are also available for you to educate our communities on the CNS® credential and the value of working with a CNS®. Membership packages to assist you in starting and growing your practice are in the works.

#### MEDICAL PRACTITIONERS:

Working with a CNS® adds value to your practice by enhancing the patient health experience. A CNS® can help your patients get closer to your recommended health goals by incorporating their advanced nutrition training with your medical expertise. Become a part of NuMed to see how medical nutrition therapy can benefit your practice or institution!

If you are a science or health-based organization and would like to reach clients and practitioners as well as work together to help bridge the gap between nutrition and medicine, we would love to work with you

Get started today by simply clicking the provided link and completing the registration process.

Here are a few key benefits that clients of Evexia Diagnostics receive:

#### EvexiaLink

- Create custom panels
- Establish retail pricing (for Patient Pay)
- Ease of use for the ordering of tests, kits, and obtaining results
- Functional Health Report with nutraceutical recommendations

#### Medical Education

- Assistance with clinical questions through an online “Ask the Doctor” platform as well as a fee-based, live video conferencing and telephone consultation option with the Director of Clinical Support & Education.
- Both live & recorded webinars, seminars, and educational modules designed to support and improve clinical expertise and patient outcomes.

#### Practice Management Solutions

- Customizable marketing materials
- Private label Functional Health Reports (FHRs)
- Functional Health Report brochures
- Private label topic-specific sell sheets and videos

#### Functional Health Reports

These lab interpretation reports provide clinicians and patients with an easy-to-read format that ranks imbalances, provides explanations and possible causes for those imbalances, and provides evidence-based Evexia Nutraceuticals™ recommendations specifically targeted to each patient's unique biochemistry. This feature helps to drive actionable results while supporting your recommendations in the next steps of treatment, thereby simplifying an otherwise arduous and complex process. The FHR (Functional Health Report) also helps to increase patient compliance by helping patients understand and “own” their health improvement. The Functional Health Report is designed to save valuable time as well as contribute to the bottom line.
