An eye on sustainability

Addressing the challenge

**KUONI
TUMMLARE**

Sustainability expertise combined with decades of MICE & events experience.

We understand how the MICE industry works and will be there with business-friendly advice.

From pre-event planning, through the operational phases & post-event review; we help you deliver cutting-edge sustainability practice to your events.

WHAT WE CAN DO TO HELP

Measurements

We will partner with you across the event lifecycle from pre-event design, through the operations stage to event delivery itself.

We measure your event end to end to quantify the impact (both pre and post event) based on Science Based protocols. Use smart KPI's to benchmark your impact and progress

Sustainable Procurement

We work with each supplier, to implement sustainable best practices and identifying the latest low carbon options to every aspect of the event

Key areas addressed will include transport (air and ground), event venues and accommodation, energy, water, waste recycling and digital solutions

Offsetting Solutions

However much you reduce, a residual carbon impact will remain. We help you compensate for this, with advice on credible, certified carbon offsets

We keep a close eye on the economic performance of the event and ensure solutions bring the best value

Best World Wide Eco Resort 2022 - Sardinia
