Block 1

Block 2

Block 3

Use this lifting grid along with the weft color order and block repeat information on page 53 to weave the Ribbons and Blocks Runners. As you can see in those printed charts, the background color (Block 1) alternates with the ribbon colors (Blocks 2 and 3) like this: 1-2-1-3-1-2-1-3...

For example, to weave Runner 1, begin with 8 repeats of Block 1 (as shown above) using Royal as weft, then 8 repeats of Block 2 using Magenta, then 5 repeats of Block 1 using Royal, and so forth.

While the printed charts provide weft color orders for both runners, Véronique suggests that you work out your own order based on your preferences and the colors in your stash. But remember that Block 1 is reserved for the background color only (in this case, Royal).
