

Introducing: DORA

New regulations come into effect in January 2025

Financial companies everywhere are facing a significant increase in cybersecurity threats and a tightening of cyber insurance criteria. The European Digital Operational Resilience Act (DORA) aims to safeguard the financial sector against such attacks and disruptions with consistent regulatory standards for operational and digital resilience.

2025

How will DORA affect your business?

This new set of regulations seeks to create a robust information and communication technology (ICT) risk management and incident response framework across Europe's interconnected financial ecosystem. Specifically, DORA will:

- Set legal ICT risk management and reporting requirements.
- Introduce oversight of critical ICT third-party providers.
- Require incident response planning and testing.
- Establish stringent supply chain cybersecurity rules.
- Harmonize EU regulatory digital resilience standards.

How can Wiz help you ensure compliance?

Designed to protect against prevalent risks in enterprise applications, Wiz provides a 360-degree view of your cloud security environment to help you set critical cybersecurity protocols and maintain compliance with all regulatory requirements, including DORA. **With Wiz, you will be able to:**

1. **Get complete visibility of your cloud environment** and software supply chain situation in minutes, at scale.
2. **Implement strong preventative measures and tighter controls**, including over 1,400 cloud misconfiguration rules, continuous CIS and compliance monitoring over 100 frameworks, IaC scanning, real-time detections, and much more.
3. **Manage software supply chain risk** with immediate visibility into all software components, automated risk detection, and remediation guidance.
4. **Manage vulnerabilities** with regular risk assessments to analyze potential threats and weaknesses in cloud infrastructure and applications.
5. **Ensure least privilege access** to visualize, detect, prioritize, and remediate identity access management (IAM) risks.

Learn more about Wiz and how we can help you prepare for upcoming changes

Wiz's industry leading platform provides a unified approach to minimizing risk across your cloud environment. Wiz's deep risk assessment makes it easy for financial institutions to stay secure in the cloud, helping protect sensitive data and quickly assess compliance at scale.
