WIZ + 6clicks

Executive summary of the integration

6clicks is an AI-powered cyber GRC platform designed to streamline compliance with the most in-demand security frameworks like ISO 27001, NIST CSF, SOC 2, NIS 2, and DORA. By integrating with Wiz, users can automate control testing, evidence collection, and real-time security monitoring to ensure ongoing control effectiveness. Automatic alerts for non-conformities, configuration issues, and security incidents provide comprehensive compliance visibility and empower users to proactively manage and strengthen their control environment and mitigate risks.

Market challenge

Businesses manage complex technology ecosystems vulnerable to growing cyber threats, with over 6 billion malware attacks recorded in 2023. As security standards, frameworks, and regulations increase globally, manual control testing and compliance processes fail to ensure optimal protection for cloud and IT environments. Automated solutions are essential to meet evolving compliance requirements and safeguard organizations effectively.

Benefits of the integration

Together, 6clicks and Wiz enable users to:

- Leverage automated scanning from Wiz to map to relevant compliance frameworks in 6clicks, ensuring technical controls meet specific regulatory requirements
- Get alerts for control failures, configuration issues, and security incidents to enable proactive remediation
- Implement automatic documentation for audits and classification of control test results
- Gain in-depth insights, including test coverage, pass-fail ratios, and control performance
- Receive actionable recommendations for improving control effectiveness

The better together story

Achieving regulatory compliance and implementing robust security for technology infrastructure is critical to maintaining the resilience and sustainability of organizations, regardless of size or sector. With the combined solutions of 6clicks and Wiz, organizations can optimize their compliance activities and bolster cloud and IT security, helping them stay ahead in a continuously evolving digital landscape. The 6clicks platform offers integrated functionality for risk management, multi-framework compliance, and incident management. It enables users to centralize compliance oversight, streamline task management, and evaluate security and risk mitigation measures effectively. Wiz continuously scans cloud environments and automated checking of cloud-related controls, delivering in-depth security findings and an up-to-date view of their compliance status which allows users to effectively address potential risks and areas of non-compliance.

Use case overview, challenge and solution

Compliance management – Customers need an automated way to perform control testing and monitoring to provide timely insights into their security and compliance posture. Organizations need to proactively address compliance gaps and maintain ongoing compliance.

Challenge: Continuous monitoring for threats and non-compliance. Traditional methods for ensuring compliance, such as point-in-time assessments, cannot provide real-time or continuous feedback on the effectiveness of controls, making it difficult for organizations to promptly identify and respond to issues. Additionally, these processes are time-consuming and resource-intensive.

Solution: Automated control testing and evidence collection. As a solution, 6clicks connects with Wiz to equip your organization with automated and continuous compliance monitoring. By leveraging Wiz's contextualized Issues, users can perform automated tests on their compliance controls and verify in real time whether controls align with internal security requirements and external regulations. With detailed Issues from Wiz, users can consolidate evidence of control within 6clicks where they can then centralize management and make way for swift remediation. This entire process helps organizations streamline compliance management and cultivate a strong security culture.
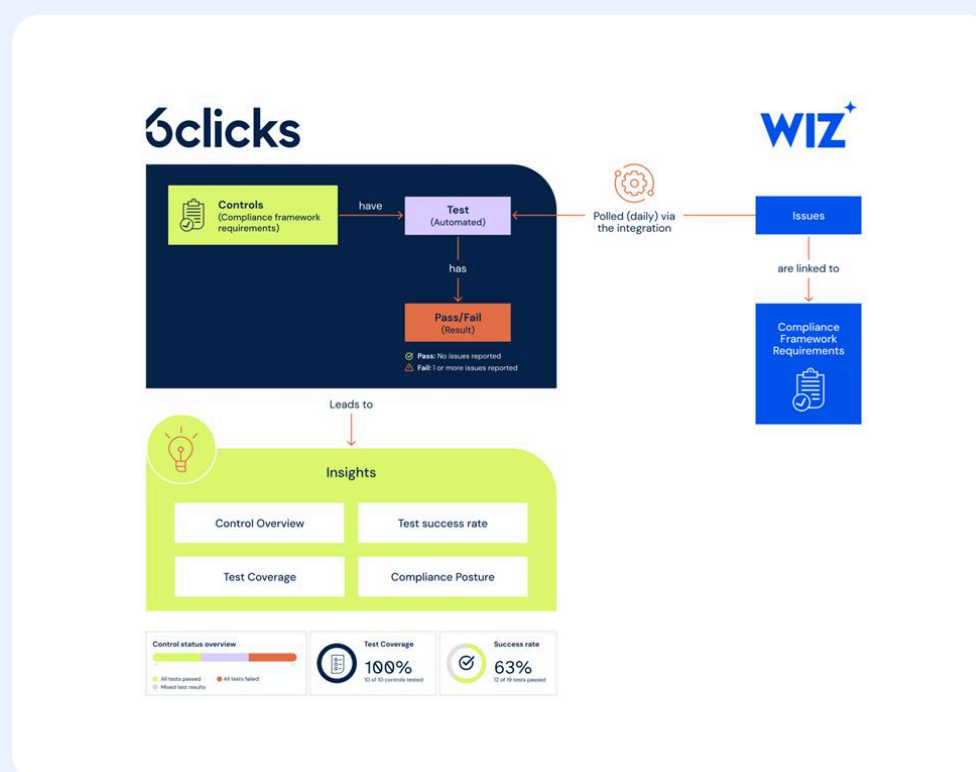

About Wiz

Wiz is on a mission to transform cloud security for customers – which include 35% of the Fortune 100 – by empowering them to embrace a new cloud operating model. Its Cloud Native Application Protection Platform (CNAPP) delivers full-stack visibility, accurate risk prioritization, and enhanced business agility. The result? More context with less noise, so that security teams can focus their time on what matters most.

About 6clicks

6clicks is transforming cyber risk and compliance with its AI-powered platform, featuring the pioneering Hub & Spoke architecture tailored for federated businesses and managed service providers (MSPs). As the first platform to introduce an AI engine specifically designed for GRC, 6clicks empowers cyber leaders and professionals to build resilient and trusted cyber risk and compliance programs.
