CDW Professional Services

Understanding the security of your cloud environment is critical.

CDW's Wiz Cloud Security Assessment

Securing your cloud infrastructure is a continuous and complex undertaking. No matter what stage of the cloud journey you are in, CDW can partner with you to proactively identify and address threats, ensuring your data and applications remain protected.

CDW's Wiz Cloud Security Services can help you achieve:

Operational Efficiencies   **Compliance**   **Reduced Risk**

Leveraging the Right Solution

CDW's Wiz Security Assessment leverages the industry's leading CNAPP platform, Wiz Cloud, to deliver a comprehensive risk summary and future state planning. As a Wiz Premier Partner, we can offer top tier pricing as well as CDW's assistance with Wiz operationalization and remediation.

Cloud Security Assessment

We assess the entirety of your cloud security footprint using Wiz's agentless scanning and comprehensive asset inventory, giving you complete visibility into your cloud risks, from build time to runtime. Then we help you prioritize those risks into a roadmap and offer remediation from our multi-cloud and Wiz certified engineers.

Leveraging the Power of Wiz

The Wiz platform provides unparalleled, agentless visibility across all cloud and on-prem environments. The Wiz journey starts with Wiz Cloud, a CNAPP that leverages its proprietary Security Graph for cloud visibility and intelligent risk prioritization to help teams focus on the most critical threats. Wiz Code shifts security left by preventing vulnerabilities in the development lifecycle, while Wiz Defend, powered by the Wiz Sensor, delivers robust runtime protection and real-time threat detection. (This assessment only leverages Wiz Cloud).

Supported Environments

CDW's Cloud Security Services are available for the following environments:

CDW's full lifecycle of Services can support your organization no matter where you are on your journey

CDW & Wiz

CDW and Wiz together offers the most complete cloud security platform in the industry, and the right people to optimize your cloud security posture.

- **Deep expertise:** CDW and Wiz both offer decades of experience and extensive cloud security knowledge to help you navigate through difficult cloud security milestones like we have for others.

- **From Code to Runtime:** Wiz gives you complete end-to-end visibility from your application endpoints, to your VMs, containers, and serverless functions, all the way to your data.

- **Operationalize Cloud Security:** Allow our teams to guide you through new challenges and risks as you embrace Cloud Computing. No matter where you are on that journey.

Design   Orchestrate   Manage   On-Premises   On-Journey   Cloud-Based

Assessment Services Overview

A summary the Wiz Cloud Security Assessments is provided below:

	Wiz Cloud Security Assessment
Multi-cloud capable	✓
Available for AWS, Azure or Google Cloud Platform (GCP)	✓
Uses native cloud tools	✓
Uses third-party security tools	✓
CSP best practices review	✓
Current State assessment against CIS v8 Critical Controls	✓
Current State assessment against NIST SP 800-53	Optional
Additional frameworks upon request	✓
Executive summary of key findings and recommendations	✓
Documented critical and high security risks	✓
Roadmap including strategy and tactics	Optional
Detailed inventory of assets with gaps on a per-asset basis	Optional

Certifications

CDW has earned the following recognition from our cloud partners:
