

Better Together: Optiv and Wiz

Secure Your Cloud with Optiv and Wiz

Many organizations struggle to detect and respond to threats in real time, causing challenges in identifying and prioritizing critical risks. Optiv works closely with Wiz to enable organizations to innovate faster, remove silos and transform their processes.

Optiv experts help clients understand the difference between good and great when it comes to Cloud Security Posture Management and Cloud Native Application Protection Platform (CNAPP). By leveraging Optiv's advisory, implementation and configuration services, alongside Wiz's CNAPP solution, organizations can enhance their security posture and get 100% visibility into their cloud stack.

Optiv and Wiz can help facilitate an efficient and seamless transition for clients looking to securely move a larger share of their business to the cloud and improve their business agility and resilience.

Optiv and Wiz Use Cases

- Product selection (e.g. vendors and modules)
- Design and Deployment of Wiz (e.g. Cloud Security Posture Management (CSPM), Cloud Workload Protection Platform (CWPP), Cloud Infrastructure Entitlement Manage (CIEM), Kubernetes Security Posture Management (KSPM), Software Supply Chain, Data Security Posture Management (DSPM), API Security and Cloud Detection and Response (CD&R))
- Configuration
- Operationalization
- Maturity Services
- Staff Augmentation

Benefits of Optiv and Wiz

- Increase workforce productivity
- Mitigate risk of cloud security breaches
- Improve collaboration across cross-functional teams
- Improve visibility across the entirety of cloud applications and services
- Operationalize Wiz to successfully deploy, configure and upskill Client teams to get the most out of the platform
