

ARMOR GROUP is recruiting students for the start of the 2023 academic year

A leading industrial player in the Pays de la Loire region, ARMOR GROUP is launching a new student recruitment campaign, with nearly 40 positions to be filled and internships, from Bac+2 to Bac+5, in industrial and support functions.

ARMOR GROUP offers a wide variety of positions across all its activities: Technician Chemist (M/F), Assistant Industrial Manager (M/F), Photovoltaic Film Production (M/F), Human Resources and Training Assistant (M/F), Communication and Marketing (M/F), Energy Performance Engineer (M/F), Business Analyst Sales Forecast (M/F), etc.

What this wide range of professions have in common is **an ambitious industrial vision aimed at providing society's challenges**. Backed by a century's worth of expertise in formulation and ARMOR GROUP is committed to innovating **to meet the challenges of tomorrow**, through five subsidiaries that ARMOR-IIMAK, ARMOR PRINT SOLUTIONS, ASCA, KIMYA and ARMOR BATTERY FILMS.

"As a manager, I'm convinced that a company is first and foremost people working for other people. Everyone is invited to be an agent of progress and change. That's why, at ARMOR GROUP, we give a central place to training and to passing on our know-how to the younger generations who want to become involved in the company. Generations eager to commit themselves to sustainable sustainable careers. Every year, we welcome dozens of interns and work-study students. Their enthusiasm and strong convictions feed directly the Group's transformation. If you want to make an impact and co-construct an innovative and sustainable corporate project, don't hesitate join us!" comments Hubert de Boisredon, Chairman and CEO of ARMOR GROUP.

About ARMOR GROUP

ARMOR GROUP is a responsible player committed to societal innovation. Within this international industrial group, the community of men and women who make it up apply their know-how to the production and innovation of essential components. Formulation (inks, filaments, etc.), high-precision coating, thin-film cutting and the circular economy are just some of the areas of expertise that the Group brings to bear on society's challenges. Since May 2022, the Group has been 100% owned by the management team and 380 employees. The group is world No. 1 in the design and manufacture of thermal transfer ribbons for printing variable traceability data on labels and flexible packaging (ARMOR-IIMAK). A leading European player in innovative, sustainable inks and consumables, as well as printing services (ARMOR Print Solutions), ARMOR GROUP is also a pioneer in the development and production of innovative materials such as organic solar films (ASCA), coated collectors for electric batteries (ARMOR Battery Films), and customized filaments and parts for additive manufacturing (KIMYA). With an international presence, ARMOR GROUP employs nearly 2,500 people in some twenty countries on four continents. The group achieved sales of €447 million in 2022. Each year, it invests nearly €50 million in industrial equipment and R&D. www.armor-group.com
