VIRGINIA INSTITUTE OF
PLASTIC SURGERY AND MBODY:
MODERN BODY CONTOURING
AND LASER CENTER

For Burton M. Sundin, MD and Reps B. Sundin, MD, it's all in the family. With over 30 years of combined experience, the brothers are experts in facial and body rejuvenation. Together, they co-founded Virginia Institute of Plastic Surgery and Mbody: Modern Body Contouring and Laser Center, which was founded in 2014 as the noninvasive division of their successful plastic surgery practice.

Both doctors have completed advanced fellowship training in cosmetic surgery and are dedicated to offering patients the latest technology and modern techniques. They are known for their signature, trademarked liposuction, LITTLE Lipo®, which utilizes gentler, vibrational liposuction and skin tightening with Renuvion.

“We are also experts in cosmetic facial rejuvenation, including Deep Plane Facelift and Necklift, Eyelid Lift, Rhinoplasty, Botox and Fillers and Genius RF Microneedling,” they say. “No matter what goals our patients have, we strive for natural- looking and beautiful results using modern techniques in the safest manner possible.”

Their experience with body contouring expands to CoolSculpting, as well. MBody is one of the leading providers of CoolSculpting in the nation and the doctors boast over 14 years of CoolSculpting experience, having performed over 20,000 treatments during that time frame.
