Protecting critical systems and sensitive information.

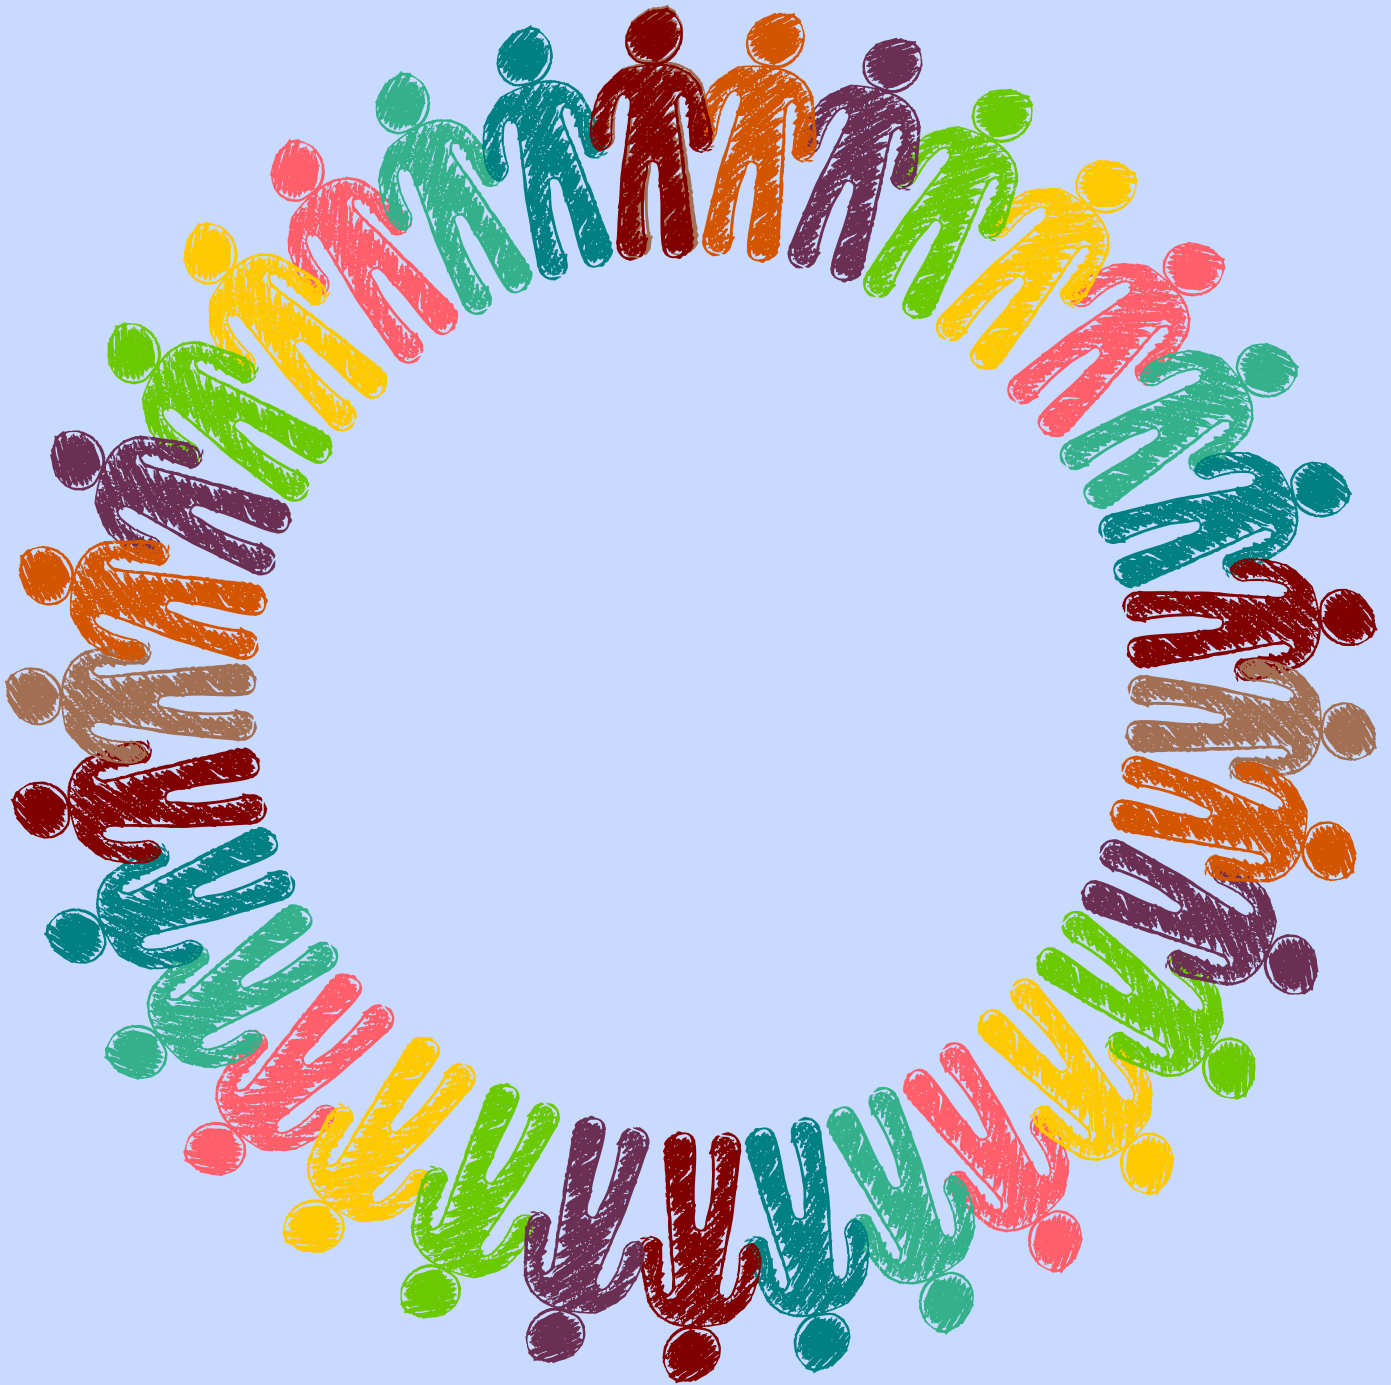

Managed Services

Ensure your IT functions deliver business value for years to come.

What does 100% Employee Owned mean?

In early 2023 Trusted Technology Partnership changed ownership models to an Employee Ownership Trust (EOT). Simply put, an Employee Ownership Trust means that the employees of a company have the benefit of shareholding but without the responsibility of actual shareholding. Being an Employee Owned business means that employees have a direct stake over the company's future success. Research suggests that EOT's combination of co-ownership and employee contributions delivers a superior business performance to traditional models. Employee Owned Business are a growing part of the UK economy, and we are proud to be a part of this exciting movement.
