

Carbon Reduction Plan

Supplier Name: Trusted Technology Partnership

Publication Date: October 2025

Commitment to achieving Net Zero

Trusted Technology Partnership is committed to achieving Net Zero emissions by 2045.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2024	
Additional Details relating to the Baseline Emissions calculations.	
This was the first time we had reported our carbon footprint, so this calculation establishes our baseline. It is based on our financial accounting year of April-March. Our Baseline calculation includes: • Scope 1: Direct Emissions • Scope 3 Categories: 4: Upstream transportation & distribution: 5: Waste generated in operations: 6: Business travel/Hotel stays: 7: Employee commuting/Teleworking: 9: Downstream transportation & distribution: Our Baseline deviates from the requirements under PPN 06/21 as follows: • Scope 2: Indirect Emissions is not included as renewable electricity used to heat & power office, no heat or steam was purchased.	
Baseline year emissions:	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	48.8 tCO ₂ e

Scope 2	0 tCO ₂ e
Scope 3 (Included Sources)	174.1 tCO ₂ e
Total Emissions	222.9 tCO ₂ e

Current Emissions Reporting

Reporting Year: 2025	
EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	48.8 tCO ₂ e
Scope 2	0 tCO ₂ e
Scope 3 (Included Sources)	174.1 tCO ₂ e
Total Emissions	222.9 tCO ₂ e

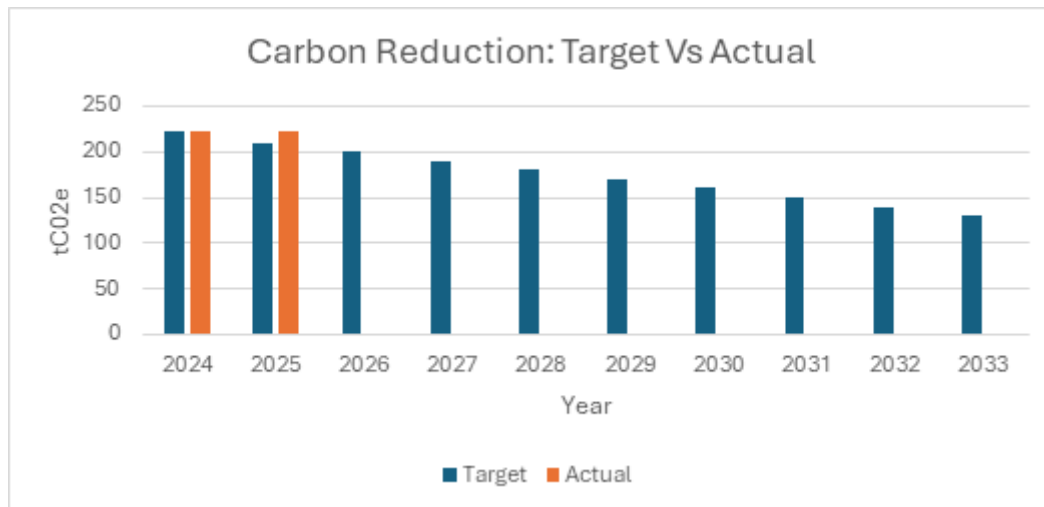

Emissions reduction targets

In order to continue our progress to achieving Net Zero, we have adopted the following carbon reduction targets.

We project that carbon emissions will decrease over the next five years to 169.8 tCO₂e by 2029. This is a reduction of 23.8 %.

Although our carbon emissions have not reduced compared to our baseline year, this initial period has been valuable in deepening our understanding of the company's overall emissions profile. Our primary focus in the current year is to reduce emissions, particularly Scope 3, where we have identified the greatest opportunities for meaningful impact.

Progress against these targets can be seen in the chart below:

Carbon Reduction Projects

Completed Carbon Reduction Initiatives

The following environmental management measures and projects have been completed or implemented since the 2023/24 baseline and the measures will be in effect when performing the contract.

- Hybrid working pattern
- New offices have high BREEAM rating
- Solar panels on warehouse, now producing excess solar energy being fed back into the main grid
- Implemented segregating food waste and separate disposal
- Created a 'Green Team' to help communicate strategy and drive change
- Purchased hybrid cars for engineers.

In the future we hope to implement further measures such as:

- Reduce commuting emissions by 7% by 2026 by sign-posting car share schemes
- Introduce public transport first policy
- Ensure, where possible, all electric items are turned off at wall when not in use & implement energy saving IT settings for all employees
- Investigate training on fuel efficient driving
- Engage with distribution partners to utilise eco-friendly distribution options

Carbon Reduction Plan

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans. Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard and uses the appropriate Government emission conversion factors for greenhouse gas company reporting.

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of the Supplier:
