

PRESS RELEASE

THE THIRD, LARGEST TO DATE, SPLET TECH CONFERENCE

Biggest regional innovation gathering this fall in Belgrade

Technology enthusiasts, startup teams, investors, students, professors, and other innovators will once again have the opportunity to be part of the **SPLET TECH conference** on **October 8th** this year. Following the success of the previous two years, with nearly 200 top-notch speakers from various fields and over 4500 participants, this year promises a record number of intriguing speakers, sessions, and topics.

In October, on 9 stages at the MTS Dvorana, speakers from both domestic and international arenas (both from the county and internacional) will discuss about web3 technology, business pivoting, exit strategies, sales, business internationalization, technology's impact on legislation, and multidisciplinary teams.

Attendees will have the chance to learn all about innovative technologies and the ones creating them through workshops, motivational lectures, and will have the opportunity to connect with potential collaborators, investors, and users. Moreover, SPLET is an ideal opportunity for those looking to showcase and promote their products and businesses. The Startup and Expo Zone this year will, once again, be at display where attendees can discover what companies and startups are creating. A new addition this year will be the VC Zone, gathering Venture Capital funds and business angels.

The conference organizers are the projects "Venture an Idea" under the realization of the "Digital Serbia Initiative" and "Serbia Innovates" run by ICT HUB, with support from USAID.

Applications are open! More information about the program will be soon available on the [SPLET TECH 2024](#) conference website.

Since 2001, the USAID has invested more than 886 million dollars in stimulating economic growth, strengthening legal system and promoting democratic administration in Serbia.
