

VACUUM is

**In South Korea and North America-based blockchain software company [SCOPE]
This is a new [Metaverse Union] project.**

**We are a team of professionals with many years of industry experience,
Form alliances with various metaverse projects through interesting and effective
collaboration with. This will be a fair competition and a place for those who have the
same dream.**

**First,
we issue [Vacuum Coin] to which ERC-based smart contract technology
is applied. It is designed as a utility token that can be actually used on/offline as
well as on the metaverse. We develop a crypto system that can flexibly cross the
boundary between investors and users.**

**VACUUM's community takes advantage of an all-new chat reward system called
C2E [Chat to Earn]. It also aims for a Web3 lifestyle community that extends from
Game-Fi and attractive character elements. We aim to build a platform that will
continue to be sustainable by actively nurturing independent content for users.**

**We would like to solve the new problem of 'lack of communication' that occurred
during the pandemic era together with you.
Its vision is WEB 3.0 instead of a huge data center the size of 10 soccer fields, It will
be a huge step forward from PC where you have to sit at your desk to mobile.**

**We believe that [blockchain] is the most democratic system in human history.
We will create 'actual use cases of cryptocurrency' through Vacuum Coin, we also
research and develop industry-friendly technologies [B2B] such as 'documentation
of NFTs'.**

**VACUUM is serious about the right direction for the future humanity.
Resisting the monopolization of specific companies in the block chain industry
and Web 3.0 technology.
We are Create a donation program to support space science gifted students.**

Metaverse Union [MU]

**We're creating space with huge black holes visible
It was designed as a space optimized for the feast of 'subcultures'.
We aim for a platform for active collaboration between blockchain projects.**

**Furthermore, we want more people to learn about the era of the
'metaverse' through [MU].
We make corrections and supplements by actively utilizing the opinions
of the community in real time.
The ultimate goal is to complete the space of infinite expansion
together.**

Information currently available

- * Real-time communication is possible through chatting, voice chatting,**
- * R&D for RVT [Real-time Voice Translate] Technology**
- * The play time is reset every 15 minutes after entering.**
- * A specific area named 'Bubble' is designated**
- * [MU] publishes activity records as NFTs**

Phase 1. Teaser video presentation and marketing

Phase 2. First update and alpha version testing

Phase 3. 2nd update and beta test

Phase 4. Metaverse Union [MU] officially launched

Chat To Earn [C2E]

**Introducing a new concept called [C2E] to the community of VACUUM
This is an attempt to encourage users' online activity.
It has the potential to become a key utility for tokens with Web 3.0
technology.**

**By self-developing Combot applicable to Telegram and Discord,
Automatically log activities in the community and filter out malicious
activity
The reward is paid in cryptocurrency.**

Technologies

Development and progress of Web 3.0-based wallet connection technology

It is the most important core technology used in all blockchain services.

Web server operation and Backend development completed and proceeded

Cross-chain bridge, auction system, Game-Fi claim, etc.

We develop services through our own server operation.

Frontend development in progress

Through seamless implementation on mobile and web simultaneously

Provides UI/UX to use the service.

Block chain and smart contract development completed and proceeded

We develop token-related functions such as tokenomics, whitelist setting, anti-rug pull, and lockup.

and others

Web 3.0 3D Game Development

Launchpad Development

Marketplace Development

Roadmap

Phase 1.

VACUUM Online Community Formation and Marketing Push
[Call Channels and Influencers]

Phase2.

METAVVERSE UNION Alpha Version Released
[Web 3.0 technology and community testing]

Phase 3.

Issuance of VC and listing on DEX and CEX
[Uniswap and Top 10 CEX]

Phase 4.

Creating VC Use Cases in Game-Fi
[Collaboration with CRR P2E and other projects]

Phase 5.

METAVVERSE UNION beta version released
[User accessibility and UI/UX testing]

Phase 6.

Creation of VC use cases on/offline
[Brewery and cafe collaboration in progress]

Phase 7.

1st METAVVERSE CONFERENCE held
[METAVVERSE UNION Revealed]
