OUR VISION VACUUM

VACUUM is a main project carried out by blockchain company [SCOPE] based in South Korea and North America. All of our teams were made up of experts from various fields.

We'd like to solve a new problem called 'lack of communication' that occurred in the pandemic era. Realization of our vision does not rely on huge data centers the size of 10 football fields, but a step further into WEB 3.0 technology.

Our vision with VACUUM is to create and service the next generation of Social media using the web 3.0 technology and introduce the concept of social and finance(SNF).

And we aim to achieve our objective using two methods.

First, Vacuum aims to contribute to the mass adoption of decentralized digital currency using the blockchain technology. We will develop and service a number of financial products utilizing a De-Fi token [Vacuum Coin] that will be issued by the Ethereum chain. In addition, we are carefully and steadily establishing partnerships with organizations in various fields to create 'actual use cases' online and offline.

Second, we are creating a virtual space known as Metaverse and applying blockchain Web 3.0 technology to create an online social network that has never been created before. Designed with mobile-optimized UI and UX, [Metaverse Union: MU] will compete against an industry dominated by a small number of social media giants. [MU] is going to be a whole new online space where we can take control of our own information and use a single profile in every Web 3.0 world. We'll also develop and apply [Real-time Voice Translate: RVT], a 'real-time voice translation technology' that allows you to be completely free from keyboards.

VACUUM aims to provide an alternate path for the future of mankind by researching, developing, and implementing the possibility of linking space technology with blockchain. We are trying to create a blockchain service that utilize satellites. In addition, we'll create a donation program to support the talented students of space science.

2022 ©VACUUM ALL RIGHTS RESERVED.

VACUUM

METAVERSE UNION MU

Metaverse Union: [MU] is a web3-based virtual space: Metaverse that applies personal wallet technology linked to the blockchain. It is designed as a space optimized for 'subcultures' that are increasing day by day.
We aim for a platform for active collaboration between blockchain projects. Furthermore, more people have a sense of duty to enter the era of "metaverse" through [MU]. All operations actively utilize the community's opinions in real time to modify and supplement them.

[MU] has a world view set in an endless universe, with a blue circular black hole rotating in the center. Avatars that need to be created to enter can be selected by the individual and can also be purchased as NFTs and used as permanent avatars.
You can swim in space with your avatar and communicate with other users such as text chat, expression of emotions, emoticons, and voice chat, which will be expanded to photos, videos, and files later.

[MU] There is a system within which you can create and operate an independent space called 'bubble'.
There are many ways to use a more personal space called 'bubble'. It can be a group of members of the game, it can be a community of Crypto projects, it can be a place to find new relationships.
It also hosts a 'metabus conference' through aggressive partnerships with other crypto companies to suggest ways to solve the job search problem in the blockchain industry.

In [MU], a 'time limit system' that resets all past chat data and play locations every 15 minutes applies to all areas except bubbles. It offsets the possible entanglement of negative phenomena in developing a whole new online social network.
Watch, I'm sure it'll be fun!

Step 1. Teaser video presentation and online marketing
Step 2. Recruitment of first update and alpha version tester
Step 3. Update 2nd Alpha Version and Create Sound Effects
Step 4. 3rd Update and influencer Engaged Beta Testing
Step 5. Metaverse Union [MU] Official Launch and Large Marketing

* Only those who participated in VC's TGE will be selected and MU's first alpha test will be conducted.

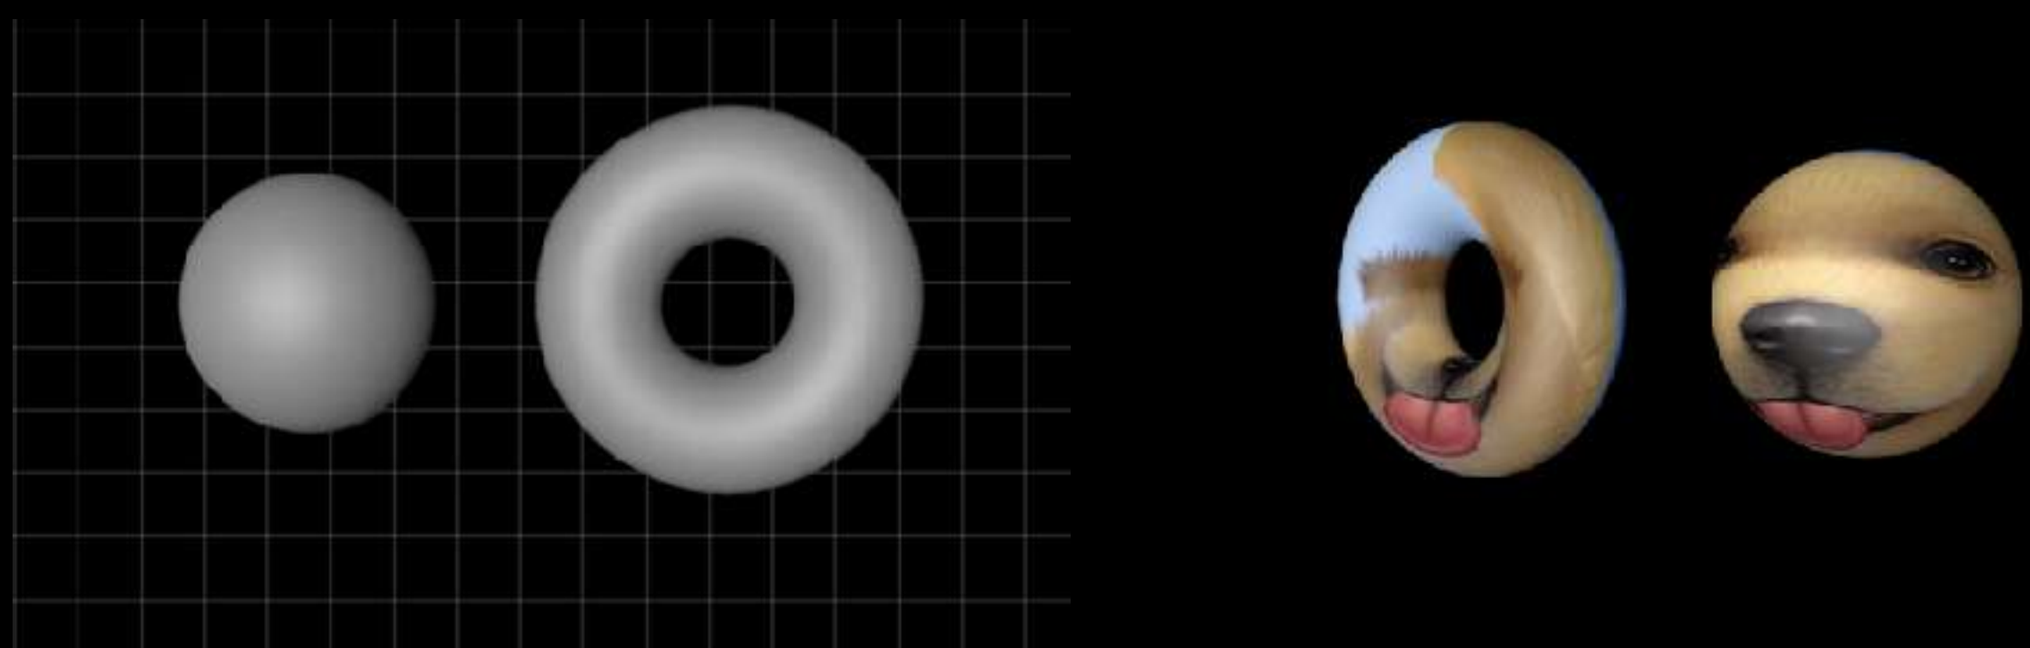
VACUUM

PLAY MU ECOSYSTEM

AVATAR

Before entering the [MU], select the pfp you want for your avatar to be used in a generator that will apply your image in 3D, real time. Every time you access the [MU], you must create a new avatar, but you can use it permanently if you purchase an ready-made avatar as NFT.
This can be purchased using the VC token (listed price: $100 VC)
Each of the 'ball' and 'donut' shaped avatars has a gender of 0 and 1. We are also planning to add more genders that has different 3D shape of avatars.



BUBBLES

Imagine bubbles floating in the air in the vast space that have a very rich environment of hydrogen or H2O in it. And in the center of the universe, there is a huge waterfall that acts as a screen, which is just one of the many services for the users of the bubble feature. If you have a certain number of VCs or hold a specific NFT, you can freely create and destroy bubbles inside [MU]. To enter a particular bubble, you must have an NFT set to meet the conditions. Bubbles can be combined or separated between bubbles, which will effectively help maintain and grow each community.

[RVT] is a key technology in VACUUM's long-term vision.

Currently, we exerience the metaverse through smartphone screen sized devices. And when we communicate we may need the help of a virtual keyboard.

However, [RVT] is a technology designed to overcome this problem because the virtual keyboard requires at least 30% of the space within the screen. We aim to overcome this technology by allowing users use their voices and convert them into text, translate, the converted text into a designated language, and use voice support services in translated sentences as needed.

Aggressive investment/research/development is being made to implement this amazing technology more smoothly and naturally. In the near future, we aim to expand the use of [RVT] to various companies, government agencies, and charities that needs this technology the most.

VACUUM

UTILITIES ECONOMY

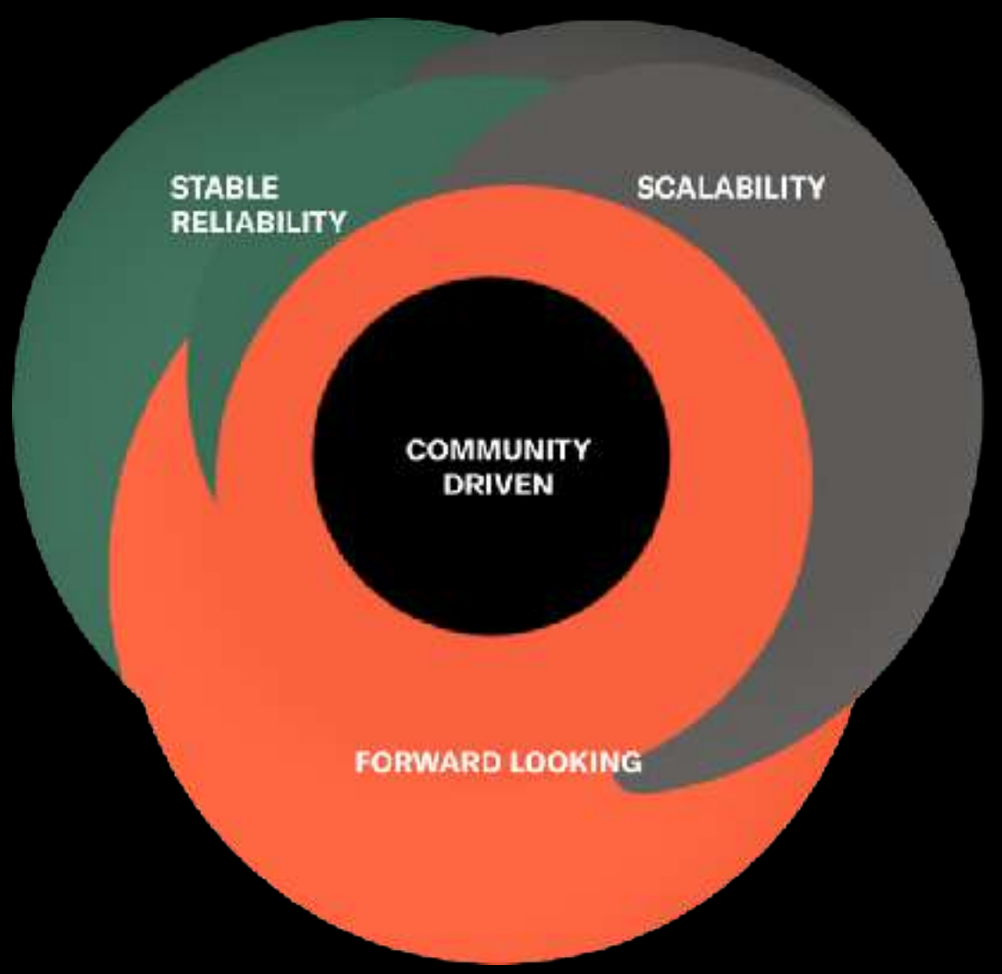
VACUUM aims to be the online currency of the next generation, alongside Bitcoin and Ethereum. We'll develop and promote Vacuum Coin to be one of the key crypto currencies in the future.

Vacuum Coin is a de-fi token issued using the Ethereum blockchain.

For every decentralized transaction, the project will collect 3% transaction fee, of which 1% is accumulated in a safety wallet, and Vacuum Coins are held and redistributed every quarter, back to the holders.

Another function will be it's utility as a governance token. Holders will exercise the right to vote on important decisions in the future.

Our philosophy is simple. Provide stable reliability and and take initiativeto actively reflect and experiment with ideas from the community to create a better utility for cryptocurrency.



*** The role of Vacuum Coin, which has high future expected utilization value allows and more**

Metaverse Union : Skins, Bubble, Play +
Payment Method : Web 3.0, Lifestyle +
Game-Fi : Play to Earn, NFTs +
Chat to Earn : Community, Marketing, Events +
Millage to Earn : NFTrip, Satellite Tech +
Investment Asset : Secure wallet +

VACUUM

COMMUNITY CHAT TO EARN

By using introducng a fairly new concept of Chat2Earn, [C2E], we attempt to encourage users to engage in online communication. Our development team understands the importance of 'to earn' meta, the most important keyword in the future utilization of any blockchain ecosystem. It's only when people get together in a new space and communicate, something valuable can be created. We'll create a metaverse 'square' where all users can join in on the conversation.

One of the most popular technology currently being applied in the VACUUM community is TUNA BOT, which uses $Sol, $TRX and other coins, but there are limitation as to what this bot can do. We are developing a new and improved version of the service in that can outperfrom Tuna in almost every category. It will be known as the [Vacuum Bot], which is under development is due to be released within 2022.

* [C2E] in the VACUUM community pays [VC] as a reference reward.

Community channel
https://t.me/vacuumglobal

Announcement channel
https://t.me/vacuumannouncement

VACUUM BOT

Soon, we'll develop and apply our own Telegram bot and Discord bot to automatically log community activities and filter malicious activities.
In addition, we'll add tipping mechanism which will be used in events and community engagement. In additional features for online chat and communities such as chatting competition and ranking system, chat reservation, and playable arcade game will aslo be launched.

[Vacuum Bot] is not exclusive for the holders of Vacuum Coin.
Any project designed to use [C2E] method can use their own desired token which they can use by providing payment in the form of Vacuum Coin.

Being developed with consideration to apply to [Metaverse Union: MU].
A separate token may be developed for a better transaction value and experience in [C2E] on the ERC-Chain

VACUUM

SATELLITE PROJECT 2023

We want to solve the security and convenience of blockchain technology by launching a satellite equipped with our own software into space.
The satellite, which is being designed to be built, is a compact satellite up to 20 cm×10 cm×60 cm in cube form and is equipped with data transmission and reception with Earth, and functions such as location information and space photography are added. Using the mathematical absolute values of satellites, we have devised an algorithm that is "unchangeable but anyone can check" and diluted it with the concept of blockchain to create a completely new service that has never been changed before.

Partner Technical Reference: https://youtu.be/URBb_FbBr_8

SPACECHAIN

SPACEBELT™

VACUUM WALLET

Develop [VACUUM WALLET] with satellite blockchain technology.

Main Features

Anti-dusting mechanism (dusting is a hacking method to randomly send holders any coins and trace the accountes related to an account to later steal information and crypto asset)
Using satellite technology for user verification instead of using a set of private key when retrieving wallet.
Intuitive UI/UX and utilities for beginners

Satellite is scheduled to be launched via Space X Launchpad in time for the official launch of [MU]. Details of the operation may change depending on external and internal conditions.

VACUUM

ROADMAP VERSION 01

Phase 1.
VACUUM Online Community Formation and Marketing Push
[Call Channels and Influencers]

Phase2.
Releasing METAVERSE UNION alpha version
[Web 3.0 technology and community testing]

Phase 3.
Launch Vacuum Coin and listing on DEX and CEX
[Uniswap and Various CEX]

Phase 4.
Creating VC utility in wihtin P2E game-fi
[Collaboration with CRR P2E and other projects]

Phase 5.
Releasing METAVERSE UNION beta version
[User accessibility and UI/UX testing]

Phase 6.
Creation of VC use cases on/offline
[Collaborations in progress already]

Phase 7.
Holding the 1st METAVERSE CONFERENCE
[METAVERSE UNION Revealed]

Phase 8.
Listing to one of Top 10 CEX in the industry
[Huobi, OKex, Kucoin, Gateio +]

Phase 9.
Release the Official Metaverse Union and Launch a Satellite
[@Space X @Q3 or Q4 of 2023]

2022 ©VACUUM ALL RIGHTS RESERVED.

VACUUM

TEAMS TECHNOLOGIES

Development of Web 3.0 Wallet Technology
Complete and progress web server operation and back-end development
Front-end back-end developing process
Providing UI/UX for service use on mobile and web
Blockchain and Smart Contract Development
Development oftoken-related functions such as tokenomics, whitelist settings, anti-rug pools, lock-up, etc.

In progress

Web 3.0 3D Game Development : CRR P2E
Web 3.0 Travel Boucher Development : NFTrip
Launchpad Development : TINA Launchpad
NFT Collections Development : 19XX
Satellite to Blockchain Development : Partnerships

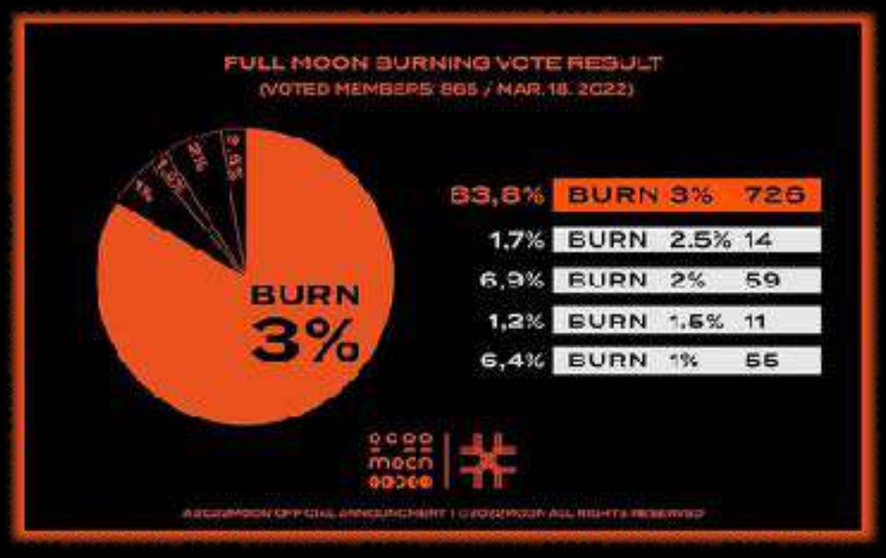
2022MOON : 2021/11/13 ~ 2022/09/04

https://www.2022moon.com/
http://wiki.2022moon.space/index.php/Main_Page
https://whitepaper.2022moon.space/

2022Moon is a decentralized finance project launched by SCOPE Company. 2022moon was a high-interest financial product based on bep-20 chain which gave out interest to its holder in the form of Dogecoin, one of the most popular memecoins in crypto.

After launch, 2022M token moved up to a total market capitalization of $21 million.
2022M aimed to be a deflationery project that decreased it’s total supply every fulll moon, using community voting.



Activity History

Second largest fundraising in Pinksale Launchpad’s history until Nov. 2012: 2,000 BNB
Achieving 3,000 holders and listing on CEX: Bitmart, Lbank
Issued by Vanguard NFT and made goods
Cross-chain swap technology on Bep20 chain and Erc20 chain
Bus Route advertisement in Seoul: Gangnam/Jongno/Noryangjin route
Las Vegas CES 2022 as a Fintech Company
Miami Bitcoin 2022: Hosted a VIP Yacht Party
2022 MOON Custom Metal Card Production and Distribution
Development of P2E technology with 2022M applied to CRR Game-Fi
2022 New York NFT Conference: Venture Capital and Consulting Meeting

2022 ©VACUUM ALL RIGHTS RESERVED.

SCOPE

NFTrip

NFTrip is a Web 3.0-based travel voucher application service.
Releasing in 2023,
The web 3.0 app will allow users to use location-based services
to generate NFTs for travel.
It can also be used for keeping your travel records.
Various research and development are underway to bring innovation.

Travel and Cryptocurrency

SCOPE

Crazy Rich Rabbit GAME : Play to Earn

https://crazyrichrabbit.io/index.do

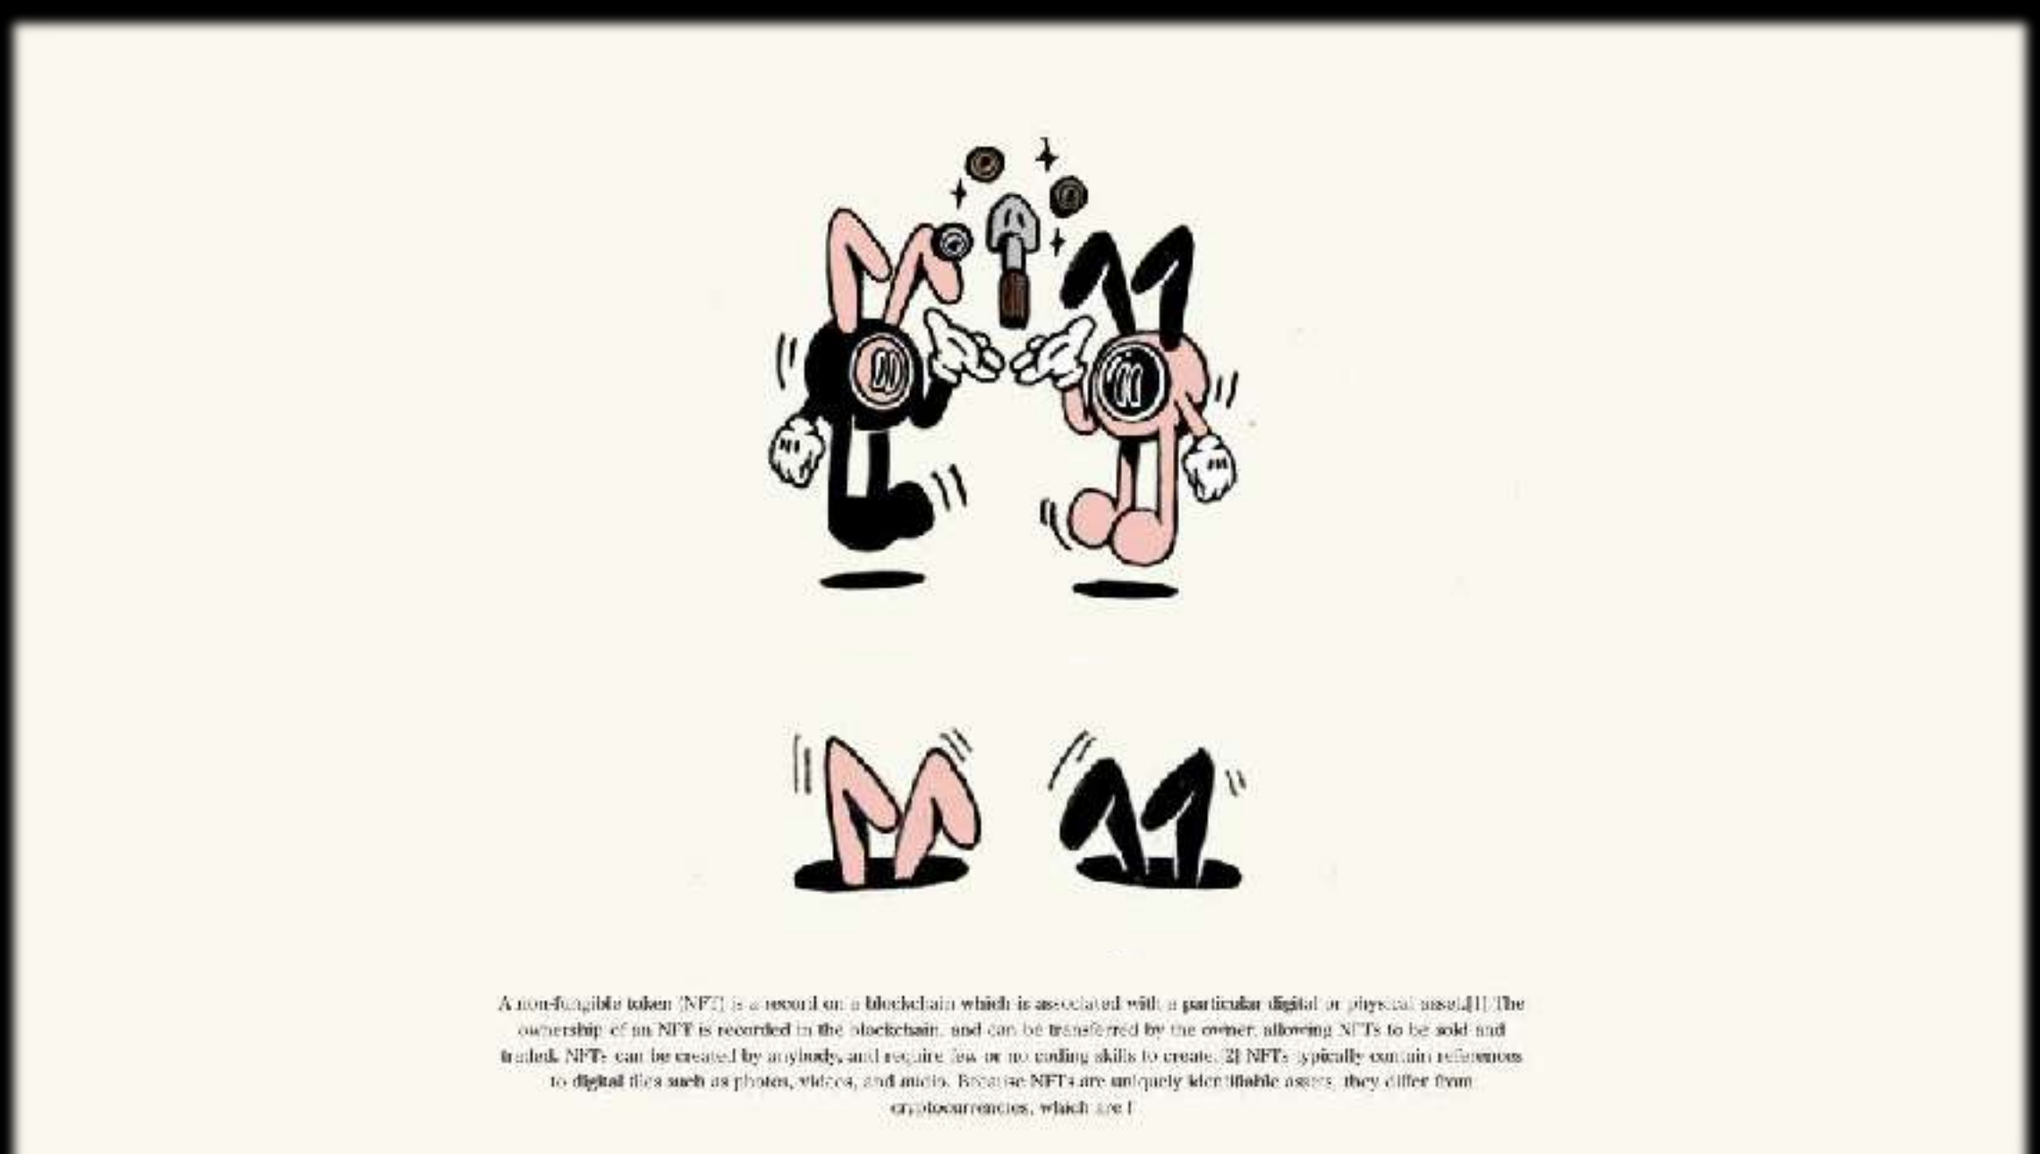
Crazy Rich Rabbit's games will be arcade styel, easy to play and play to earn game. The first CRR game is a ‘Flappy Bird’ type of game that’s ready to play and the second in the series will be released in the first half of 2023 as an adventure/action genre game where the players play earns the VC tokens by defeating the endlessly approaching obstacles and villains.

*** Currently, CRR’s P2E game rewards the players with VC Points, which the players can redeem for Vacuum Coin after the tge.**

Crazy Rich Rabbit : Renewal

Brand renewal for Crazy Rich Rabbit's full-fledged metaverse debut is being rapidly developed. It is planned in the order of website, game 1, NFT 2, game 2, and production of merch is going to be updated with renewed graphics and storylines.

CRR is making Web 3.0 one of the most beloved characters in the world: IP.



A non-fungible token (NFT) is a record on a blockchain which is associated with a particular digital or physical asset.[1] The ownership of an NFT is recorded in the blockchain, and can be transferred by the owner, allowing NFTs to be sold and traded. NFTs can be created by anybody, and require few or no coding skills to create.[2] NFTs typically contain references to digital files such as photos, videos, and audio. Because NFTs are uniquely identifiable assets, they differ from cryptocurrencies, which are f

2022 ©VACUUM ALL RIGHTS RESERVED.

SCOPE

Crazy Rich Rabbit is a Web 3.0 character brand created and operated by the Scope Company. Crazy Rich Rabbit(CRR) will have a collection of arcade style P2E games and NFTs that give out rewards in $VC. We aim to secure users through creating the best p2e series from one of the best teams in Korean Crypto-space The overall renewal of the Crazy Rich Rabbit brand is under way and is schedule to be launched for December 2022.

Currently, a new character design and worldview have been confirmed, and related stories are being created.

Crazy Rich Rabbit First NFT : Montage Collection
https://opensea.io/collection/crazy-rich-rabbit

Crazy Rich Rabbit (CRR) NFT Collection is uniquely designed 111 images. Characters are created in 3D created by our in-house designer, Narli from Turkey.

Holders of CRR NFTs, will be given in-game benefit in the CRRP P2E game and chance to earn more tokens during the game.

In addition, the holders are also eligible to participate in TGE of Vacuum Coin.
