

EDGE ANIMATIONS

revolutionize
patient education

Enhance patient education and compliance with the ever-expanding collection of powerful videos from Edge Animations. Ensure your patients are fully informed about their treatment with videos about a wide range of topics.

EDUCATIONAL

Powerful surgical and true 3D (stereoscopic) animations rendered with cutting-edge techniques make Edge Animations a powerful educational tool. Ensure your patients are fully informed about their treatment from videos such as brushing, foods to avoid, extractions, TADS, and much more.

CUSTOMIZABLE

With an easy-to-use graphical interface, effortlessly annotate and draw on animations. Customizable playlists, custom audio narration, and the ability to include background music or audio files are available. With drag and drop capabilities, virtually any image or movie can be included as well as patient findings.

MARKETABLE

Export files in a WMV format, email links to patients and referrers, and publish videos directly to Facebook and YouTube. Any exported video can be marked with your own personal logo.

MOBILE APP

Take the power of Edge Animations to your smartphones and tablets with the Edge Animations app. This app is free to any user and is available for both Apple and Android devices.
