

Title: 3400
Louvre Operation: Motor x 2
Control Method: Remote and Post Mount
Colour: Traffic White RAL 9016 Anthracite Grey RAL 7016
Lighting: LED Strip
Power Requirements: 10 Amp circuit
Material: Powder Coated Aluminium
Recommended Foundation: Concrete* * Check with your local council

This pergola is intended as a semi-permanent structure - Please contact your local council for semi-permanent structure approval requirements.

# NOTICE

## **Equipotential Bonding Compliance Obligation**

This product is subject to Equipotential Bonding compliance in accordance with the Australian and New Zealand Standards (AS/NZS 3000: 2018 Electrical Installations) otherwise known as the Wiring Rules. If this product is installed within arms reach of a body of water including spa, swim spa or pool, then Equipotential Bonding MUST be performed by a licensed electrical person prior to the product being used. This is a mandatory requirement. As the purchaser of this product, you are responsible for ensuring compliance with this requirement at your own expense.

## **Frequently Asked Questions**

This section is designed to provide a simplified overview of current regulations in reference to Vortex Pergolas™. It is not state specific and therefore is not a complete guide.

We advise you to seek independent advice for your individual site requirements.

#### Do I need council consent to install a pergola?

This depends on the state you live in and the value of your complete project. Please contact your local council for the complete details.

#### Can I install my pergola onto a deck?

Yes, however, the engineering that has been done is based on a concrete footing. If you wish to put the pergola on a deck, you must have the foundation certified by an engineer.

#### Do I need engineering for my pergola?

Spa World provides engineering documents on the following pages. The engineering is based on standard concrete foundations. Any variation from the standard foundation will require re-engineered certification.

#### Do I need an Electrician for the installation of my pergola?

Yes, a licenced electrician is required to hardwire the electrical supply to the motorised pergola. The cable can be hidden by running it through the posts for a tidy finish.

How Many motors are on the Vortex Pergolas? 3300 = 1 3400 = 2 4600 = 2

How far do the louvres open? Roughly 90°

#### How long does it take to install a pergola?

Each installation will vary based on many factors including, location, foundations, workers availability and experience etc. As a guide, a pergola can take 4-6 hours with 3 people.

**Do Vortex Pergolas have a wind rating/classification?** Yes, you can find that on the following pages.

What grade of aluminium is used in the Vortex Pergolas? 6063-T5. (Detailed information available in the following pages)

Are the pergolas available in a lower height model? Unfortunately, we cannot provide custom sizes.

**Am I able to attach the pergola to an existing structure, such as a house?** We recommend that you discuss this option with your builder/ engineer.

**Can we have changing colours in the LED Lighting?** Unfortunately, we are unable to offer this at this stage.

Do the Louvres automatically close when it rains? The louvres do not automatically close when it rains.

Does Spa World offer an installation service for pergolas?

Unfortunately, Spa World is unable to offer an installation service. Please talk with your sales consultant and they may be able to provide installation contractor options for you to consider

## Installation Video

Please follow the URL or scan the below QR code with your smart device camera to access the installation video. https://www.qrs.ly/pfcwvr3

Please note that the instruction assembly steps detailed in the video may be slightly different from the manual, however, either is fine to use.

# Vortex Pergolas<sup>™</sup> Limited Warranty

Vortex Leisure Pty Ltd owns the Vortex Pergolas™ brand

### 5 year structural warranty

Vortex Leisure Pty Ltd warrants the structural integrity of the pergola frame against defects in workmanship and materials for 5 years subject to the limitations, conditions and exclusions expressed in this warranty.

## 1 year lighting warranty

Vortex Leisure Pty Ltd warrants against any defects in the LED lighting supplied by Vortex Leisure Pty Ltd for a period of 1 year from date of manufacture. This warranty does not cover damage to the lights caused by incorrect use.

### 1 year motor warranty

Vortex Leisure Pty Ltd warrants the motor against defects in materials and workmanship for a period of 1 year from date of manufacture. This warranty does not cover damage to the motor caused by incorrect use.

### 1 year electronic components warranty

Vortex Leisure Pty Ltd warrants electronic control systems against defects in materials and workmanship for a period of 1 year from date of manufacture.

## 1 year pergola blinds warranty

Vortex Leisure Pty Ltd warrants the pergola blinds against defects in materials and workmanship for a period of 1 year from date of manufacture. The blinds must remain retracted when not in use. High winds can damage the blinds and this damage will not be covered under warranty. Fading and weathering of the surface will occur naturally over time, and are not considered defects and will not be covered under warranty.

### 1 year louvre roof warranty

Vortex Leisure Pty Ltd warrants the louvre roof and its components against defects in materials and workmanship for a period of 1 year from date of manufacture. Fading and weathering of the surface may occur naturally over time, and are not considered defects.

### 1 year powder coat warranty

Vortex Leisure Pty Ltd warrants the powder coat for a period of 1 year from the date of delivery. Fading and peeling may naturally occur over time and will not be covered under warranty. Damage caused to the powder coat due to improper use will not be covered under warranty. Disposal of any component replaced under warranty will be the owners responsibility.

### Warranty coverage

Warranty coverage begins at the delivery date. Vortex Leisure Pty Ltd only extends this warranty to the original purchaser and only if the pergola has been purchased through an authorised Vortex Leisure Pty Ltd reseller. Written notice of the defect and proof of purchase must be provided to Vortex Leisure Pty Ltd or it's nominated representative within 14 days of the defect occurring. If the pergola is required to be returned to Vortex Leisure Pty Ltd for rectification all freight costs shall be pre-paid by the customer. Repair or replacement of any defective product is at the sole discretion of Vortex Leisure Pty Ltd. To action warranty service contact the authorised Vortex Leisure Pty Ltd reseller you purchased from. If you are unable to obtain satisfactory service from your reseller written notification must be provided to Vortex Leisure Pty Ltd within 14 days of the defect occurring. Vortex Leisure Pty Ltd will pay the travel costs of the service agent for the first 50km from their base. Any further travel charges shall be the responsibility of the pergola owner.

### **Electrical connection**

Any required electrical work must be carried out by a licensed electrician. Vortex Leisure Pty Ltd reserve the right to ask for proof that the pergola has been installed by a qualified electrician.

### Warranty exclusions

- 1 Damage resulting from improper maintenance.
- 2. Damage caused to the pergola by improper use and natural fading from sunlight.
- 3. Acts of God.
- 4. Damage caused by not installing the pergola correctly.
- Damage caused by incorrect electrical installation, 5. brownouts, voltage spikes or operating pergola out of +/-10% of voltage range.
- Commercial use reduces all warranties to maximum 6 6. months
- 7. Damage caused by relocation of the pergola from its original installed location.
- 8 Damage caused by third party carriers.
- 9 Drain or gutter leakage.
- Damage to frame caused by unrepaired drain leakage. 10.
- Remote batteries are excluded from the warranty. 11.

## Limitations

This warranty is the only warranty offered by Vortex Leisure Pty Ltd and excludes any other implied or oral undertakings. Except as described above, this warranty does not cover defects or damage due to normal wear and tear, improper installation, alteration without Vortex Leisure Pty Ltd prior written consent, accident, acts of God, misuse, abuse, commercial or industrial use, use of an accessory not approved by Vortex Leisure Pty Ltd, failure to follow Vortex Pergolas™ or Owner's Manual, or repairs made or attempted by anyone other than an authorised representative of Vortex Leisure Pty Ltd. Vortex Leisure Pty Ltd or its agents will not be liable for any incidental or consequential loss or injury. Vortex Leisure Pty Ltd will not be liable for costs associated with but not limited to building alterations, removal costs, delivery costs or labour costs associated with the replacement or repair of pergola and parts.

VPW030821

# Certificate of Compliance

## Building Act 1993 Section 238(1)(a) Building Regulations 2018 Regulation 126

## CERTIFICATE OF COMPLIANCE FOR PROPOSED BUILDING WORK

## This certificate is issued to

TBA

## This certificate is issued in relation to the proposed building work at:

N/A - the Vortex 3400 Aluminium Pergola

## Nature of proposed building work

Construction of a \*new building/\*extension/\*alteration/\*change of use/\*demolition/\*removal/\*reerection of a building

## **Building classification as per NCC 2019**

Part of building: 3x4 m Aluminium Gazebo BCA Classification: 10a

## Prescribed class of building work for which this certificate is issued:

Design or part of the design of building work relating to \*Structural matter\*

## Documents setting out the design that is certified by this certificate

Document Document no. date		Type of document	No of Pages	Prepared by
2010071	19/11/20	Structural Assessment Report	14	Barrason's Engineers
GE2032JO	10/07/20	Drawings (isometric view, elevation view, connections)	3	AlunoTec

## The design certified by this certificate complies with the following provisions of Building Act 1993, Building Regulations 2018 or National Construction Code Volume 2

Act, Regulation or NCC	Section, Regulation, Part, Performance Requirement or other provision
NCC 2019 Volume 2	Part 3.2, 3.4 & 3.11 of the NCC Vol2-2019 including relevant Australian Standards: AS1170.0, AS/NZ1170.1-2002, AS/NZ1170.2-2011, AS1664.1, AS4100, AS4055, AS4673

## **BARRASON'S ENGINEERS**

Structural and Civil Consultants

I prepared the design, or part of the design, set out in the documents listed above.

I certify that the design set out in the documents listed above complies with the provisions set out above.

I believe that I hold the required skills, experience and knowledge to issue this certificate and can demonstrate this if requested to do so.

Reference: 2010071

Attention: Tony Jones, SPA WORLD

Dear Tony,

### **Re: Structural Assessment of 3x4 Aluminium Gazebo from AlunoTec**

This report is a structural assessment of the **3x4** metre aluminium gazebo manufactured by AlunoTec and is intended solely for the use by Spa World Australia.

The structural frame of the gazebo will be stable when built on a residential site classed up to the following residential wind categories: N3 and C1. Ultimate Limit State wind speed: 50 m/s Serviceability Limit State wind speed: 32 m/s

The design is in accordance with the following standards: AS1170.0, AS1170.1, AS1664.1, AS4055.1.

## **Design Assumptions and Limitations**

- This design assumes that the louvres and any attached side screen will be open on days of strong wind.
- It is assumed any attached side screen will be removed by the wind before the wind load is strong enough to destabilise the structure.
- A conservative simplified profile of the beam elements has been designed
- The aluminium louvres are non-structural and have not been assessed in this design
- It is assumed that a swim spa sits beneath the gazebo and that no goods or materials will be stored under the gazebo that block more than 50% of the cross-section exposed to the wind.
- This design has not considered snow loads if constructing in areas exposed to snow contact this office for further guidance.

The computations for the gazebo follow.

## **Column Connection Check**

M8 x 100 Expansion Bolt check:

## Bolt Capacity in Shear

ØVf	7.26 kN
Ø	0.8
Vf	9.0768
fuf	400 MPa
kr	1
nn	1
Ac	36.6 mm <sup>2</sup>

## **Bolt Capacity in Tension**

ØNtf	11.71 kN
Ø	0.8
Ntf	14.64
As	36.6 mm <sup>2</sup>
fuf	400 MPa

## Concrete Pull-out Capacity

Pull-out capacity	11.16 kN
Concrete grade	25 MPa
Shear strength	0.31 MPa
Embedded length	80 mm minimum

The column connections pass.

Regards,

//
