TANGANY

Expert insights on digital asset custody, tokenization, and regulation shaping the future of institutional finance.

Tangany speaker kit

About Tangany

Tangany is a BaFin- and MiCA-regulated digital asset custody provider headquartered in Munich, Germany. Banks, brokers, and corporates rely on its institutional-grade custody solution to offer digital assets to their clients without building and licensing the infrastructure themselves.

2019
Pioneer crypto custodian in Germany

60+
institutional partners

800,000
end customers

€3B+
assets under custody

OUR PARTNERS

eToro · Raiffeisen Bank · bitvavo · NEXO · dwpbank Deutsche WertpapierService Bank AG · flatex DEGIRO

Our speakers

Martin Kreitmair

CEO & Co-Founder

Co-founded Tangany in 2018 and led it through Germany's early BaFin custody licensing. Board member of Bundesblock, Germany industry blockchain association.

TOPICS OF EXPERTISE

- Custody for banks and brokers
- Tokenized securities
- BaFin and MiCA licensing

Simon Heinze

Solution Architect

Designs API-first custody and transfer solutions for banks, brokers, and Web3 companies. Member of the TUM Blockchain Club.

TOPICS OF EXPERTISE

- Regulated custody in Europe
- Market structure and liquidity
- API-first custody integration

Ilja Tomilin

Partnerships and Sales Manager

Works with banks and brokers across DACH, Iberia and CEE regions since 2022, to develop tailored regulated crypto custody solutions.

TOPICS OF EXPERTISE

- Stablecoins for corporate payments
- Tokenization use cases
- Institutional digital asset partnerships

What our speakers can cover

01 **Stablecoins for institutions: custody and infrastructure at scale**

What banks and payment providers need in place to hold, move, and settle stablecoins as usage picks up, from custody setup to compliance.

02 **Tokenized funds and securities: what it takes to go live**

Lessons from real bank and issuer projects: where implementations stall, and how custody, registers, and distribution need to fit together.

03 **Exchanges, liquidity, and market structure**

How regulated infrastructure shapes liquidity and market access for brokers and trading venues in the next cycle.

04 **MiCA 2.0 and global crypto regulation**

Where European regulation is heading, how it compares with other major markets, and what institutions and their partners should prepare for, seen from a regulated custodian.

05 **Who owns the key? Building vs. partnering for institutional custody**

What 80+ custody projects show about when building in-house makes sense, and what each path really costs in time, licensing, and risk.

06 **Securing digital assets in the age of large-scale hacks**

What recent exchange breaches teach institutions about key management, wallet architecture, and the controls that reduce their exposure.
