BUCK® KNIVES is unapologetically rooted in legacy, committed to craftsmanship, and defined by our customer devotion since 1902. We believe integrity and self-reliance are never out of style. Our brand stands as a bellwether of getting the job done right for over 120 years.

SINCE 1902

HANDCRAFTED, CLASSIC BLADES

For over 120 years, Buck Knives has been building our classic knives by hand with American pride, timeless quality, and iconic style. Each classic knife reflects a legacy of quality, care, and precision, balancing everyday utility with the feel of something truly well made. And while Buck's heritage runs deep, it remains just as relevant today to the younger generations as it did to the first ones who witnessed the first releases of each knife. Buck is built for those who value authentic craftsmanship, timeless traditions, and pieces designed to last and be passed down.

WHY BUCK?

SEE WHAT SETS US APART

Legendary heat treatment
created by Paul Bos

All USA-made knives built
by our knifemakers in Idaho

FOREVER
WARRANTY

Buck's famous Forever Warranty
guarantees all knives forever

Buck's story begins in 1902, when Hoyt Buck, working as a blacksmith apprentice, set out to make a better blade, shaping knives from worn-out files. Through three states, seven locations, and five generations, that same commitment hasn't changed: Buck Knives continues to handcraft dependable, enduring knives made to be used, trusted, and passed down.

CRAFTSMANSHIP • HERITAGE • AUTHENTICITY

THE BUCK LEGACY

From our in-house heat treatment to our Forever Warranty, the process of building a knife the Buck way is what makes a Buck knife stand apart from its competition.

PAUL BOS HEAT TREATMENT

Heat treat could be called “temperature treating” since Buck uses a system of hot and cold to get the most from the steel. This system was pioneered by Paul Bos, whose heat treat formulas have proven to be the best in the business. Each blade is tempered to the appropriate Rockwell hardness through a heating, freezing, and reheating system that defines the properties desired from the steel.

CLASSIC HUNTING

TRADITION THAT HAS EARNED ITS PLACE

THE 110 FAMILY

For more than 60 years, the 110 Folding Hunter has defined what a dependable field knife should be. Handed down through generations and trusted season after season, it remains a symbol of Buck tradition. With its proven 420HC stainless steel blade, genuine ebony handle, and iconic lockback, the 110 continues to deliver the reliability, ruggedness, and unmistakable Buck character that made it legendary.

HANDSOME, ICONIC, VERSATILE

THE VANGUARD SERIES

A testament to Buck's longstanding tradition of American craftsmanship, these knives embody the heritage and hand-finished quality that have defined our work for generations. From their contoured handles to functionally robust drop point blades, every detail reflects a commitment to timeless craft.

The result is a classic Buck knife, reliable, refined, and built for the wild.

EVERYDAY CARRY

AN INSTANT CLASSIC

THE 110 & 112 SLIM HERITAGE

The all-new 110 and 112 Slim Heritage Elites are the everyday answer for classic style and modern function. Inspired by the iconic design of the 110 Folding Hunter and 112 Ranger, these knives now feature a thin profile, convenient deep carry pocket clip, and premium BOS heat treated MagnaCut steel. The perfect EDC for anyone wanting a sleek yet robust pocket knife with the iconic clip point profile Buck made famous.

KNIFE KNOW-HOW

COMMON BLADE SHAPES

CLIP POINT

A clip point blade features a concave or straight cut-out on the spine leading to the blade tip. This creates a narrow, sharp tip and is excellent for detail work and piercing.

DROP POINT

A drop point blade has a spine that slopes down along the spine toward the tip of the blade. This creates a tougher tip that is easier to control and is excellent for slicing.

SKINNER

A skinner blade has a curved belly and upswung tip along the cutting edge. This shape excels at cutting through thick layers and also reduces the risk of accidental punctures.

TANTO

A tanto blade has a distinct angular edge. This creates a very tough blade for heavy use including piercing, scraping, and prying.

CLEAVER

A cleaver has a flat or slightly curving edge without an obvious tip. This blade shape is great for chopping and slicing.

WHARNCLIFFE

A Wharncliffe blade has a straight edge and an abrupt, downward-sloping spine at the tip. This blade is great for hard use, but also excels at precise detail work.

COPING

A coping blade is a narrow blade with an angular tip. This blade is designed to cut in tight spaces or to cut curved patterns.

PEN

A pen knife was originally developed to trim quill pens. This blade is essentially a miniature spear point.

SHEEPSFOOT

A sheepfoot blade is similar to the Wharncliffe but has a blunter tip. This blade is great for slicing and avoiding punctures.

SPEY

A spey blade was originally developed to neuter farm animals and, consequently, has a blunt tip to avoid punctures. This blade tends to be small and is good for sweeping strokes or skinning.

COMMON KNIFE STEELS

The Rockwell Rating (RC) is the scale that measures the hardness of blade steel.

RC 62-64

MagnaCut is a top-tier stainless steel that was designed specifically for knives. Utilizing CPM (Crucible Particle Metallurgy), MagnaCut offers an excellent mix of toughness, corrosion resistance, and edge retention not found on other high-hardness steels. A carefully balanced mix of alloyed elements and grain structure gives MagnaCut excellent performance, resulting in a steel that stays sharp even with heavy use. These properties make MagnaCut an outstanding choice for those who need a reliable, high-performing blade in demanding conditions.

RC 59-61

S35VN is a high-performance stainless steel known for its excellent balance of toughness, edge retention, and corrosion resistance. Utilizing CPM, S35VN was developed to improve on the existing qualities of S30V, with enhanced roughness and easier sharpening. Highly regarded in the knife industry, this steel is a top choice for both premium folding knives and fixed blades. Its ability to sustain a sharp edge while being relatively easy to maintain makes it ideal for everyday carry and outdoor use.

RC 58-62

154CM is a modification of 440C where molybdenum has been added. With greater corrosion/wear resistance, better edge retention, and a higher Rockwell hardness than 440C, 154CM's combination of traits make this an excellent choice in pocket knives, where edge retention and ease of sharpening in the field matter.

RC 58-60

420HC is a stainless steel that offers good corrosion resistance, ease of sharpening, and toughness at a budget-friendly price. This steel is a good choice for every kind of knife from hunting to kitchen to EDC, especially where durability and ease of maintenance are key considerations.

RC 57-58

5160 is a high-carbon steel known for its exceptional toughness and durability. Originally used in automotive springs, it is a popular choice for heavy-duty applications like axes and chopping tools. 5160 offers excellent resistance to shock and stress while being easy to sharpen, at the expense of corrosion resistance.

RC 57-59

D2 steel is a semi-stainless tool steel known for its excellent hardness, wear resistance, and durability. D2 is often used in applications requiring fair toughness and the ability to hold a sharp edge, such as in cutting tools and knives. However, it has moderate corrosion resistance compared to fully stainless steels.

Knife laws and regulations can vary significantly from location to location. As such, certain styles, sizes and blades may not be permitted in certain locations and areas. Buck Knives produces many different types of knives for a wide variety of legitimate everyday use. However, due to the complex and ever changing nature of knife laws and regulations, it is not possible for Buck Knives to be aware of specific prohibitions in areas where its knives may be purchased, carried, or used. It is the responsibility of the buyer/user to investigate, understand and comply with any and all laws and regulations that may apply to his or her area. The buyer/user is solely responsible for any claims arising from violations of these laws or regulations or any unintended use or misuse of the product.

The sale of automatic knives is federally regulated. Always check permissibility within your state or locality as non-federal personnel may be precluded from ownership or use by state laws. NO EXCEPTIONS WILL BE MADE. Purchase of automatic knives must be preceded by the submission of an Automatic Knife Acknowledgement Form. Shipping of Automatic Knives: Automatic knives shipped by Buck Knives, Inc will be sent via common courier and CANNOT be shipped by the U.S. Postal Service. All returns of automatic knives must be shipped via common courier as well, and not by the U.S. Postal Service. Our policy requires that all automatic knives require a signed Automatic Knife Acknowledgement Form.
