

## EU 1021/2019 POPs Regulation Declaration absence POP substances

Following the investigation carried out with our suppliers and considering the manufacturing process implemented, C.matic Spa declares that the substances listed in the EU 1021/2019 POP Regulation and following amendments are not intentionally used in any manufactured fittings.

However, substances concentrations, both in finished products and in raw material, are not routinely checked by chemical analysis, therefore we cannot give full warranties about their complete absence as impurities/contaminants.
