

EUROPEAN GREENS – PRIORITIES FOR THE EUROPEAN ELECTIONS IN 2024

The Greens will fight for these things at the European elections in June 2024.

GREEN AND SOCIAL DEAL FOR EUROPE

We want to invest a lot of money to help people and the Earth. This money will create many good jobs and help businesses do well.

We will use the money to make public transport better and cheaper. We will also put solar panels on roofs to make clean energy. This will lower the bills you pay for energy at home. Our plan will make sure that everyone has enough money for the energy they need.

We will get the money for this plan by making rich companies and people pay more taxes and reducing taxes for regular workers. We will also stop giving money to businesses that harm the environment.

CLEAN ENERGY BY 2040

Burning fossil fuels, like coal and gas, is very bad for our planet. We need to stop using them and switch to renewable energy, like solar and wind. This will create many new jobs and help avoid weather like big storms, very heavy rain, and very hot days. It will make everyone safer.

Renewable energy is cheaper than fossil fuels. Expensive fossil fuels make other things, like food, more expensive too.

If we don't do anything, the problem will get bigger. We will stop giving money to help people burn fossil fuels by next year. Our money will no longer go to countries that start wars and do not respect human rights.

GOOD JOBS AND FAIR PAY FOR ALL

Every worker in Europe deserves to be paid well and live comfortably. We will make sure everyone has enough money to live on, even if they don't have a job. We will also support workers during hard times, like economic crises.

Together, workers can make sure they get good pay and work in safety. Workers are important for our society. We will make sure that rights, like sick pay and holidays, are respected. We will make sure no one works without getting paid.

PROTECT NATURE

We must take care of nature and stop the loss of animal and plant species. We will protect lands and oceans against pollution and keep air and water clean. Food should not be made with dangerous chemicals.

AFFORDABLE HOUSING FOR EVERYONE

Everyone should have a home that is safe and warm in winter and cool in summer. Rents are too high. We will control rent prices and build houses so that everyone, especially young people, has a place to live. Well-built homes will be warmer and less expensive.

EUROPEAN GREENS – PRIORITIES FOR THE EUROPEAN ELECTIONS IN 2024

HEALTHY FOOD FOR FAIR PRICES

We want everyone in Europe to eat healthy food. Healthy food should not cost too much money. We will change how we spend money to support farmers who grow food in a way that is good for both people and the planet.

END ANIMAL CRUELTY!

Animals should be treated with care and respect. We will stop the use of large farms that treat animals badly and end the long transport of live animals. Animals should not be killed for their fur.

TAXES MUST BE FAIR

It is important that everyone pays their fair share of taxes, especially the very rich and big companies. This will help us have more money for important things like the planet. People who work pay too many taxes compared to rich people.

PROTECT DEMOCRACY, RIGHTS AND FREEDOMS

We will work hard to protect democracy and the rights of all people in Europe. We will stop giving money to dishonest people. We need to know what governments are doing.

We will make sure that everyone is treated fairly and can speak out without fear. People must be able to protest freely.

We should welcome and help people coming to Europe.

FIGHT FOR WOMEN'S RIGHTS

Everyone should have the same rights. Everyone should have the right to make their own choices about their body and life. People can decide for themselves who they are.

We support the right to safe and legal abortion. Women must be protected from violence.

Women and men must be treated the same. They must receive the same amount of money for the same work and get the same opportunities.

WORKING TOGETHER FOR PEACE AND SECURITY

We believe that Europe should make the world more peaceful. Europe should work together more closely when talking to other countries.

Ukraine and other countries should join the EU. We will promote peace, especially in the Middle East.

Clean energy will make us safer. It will make the world more peaceful.

With the financial support of the European Parliament.
