10	AM-17-1	Bündnis 90/Die Grünen	adoption and scaling of open and interoperable European alternatives to Big Tech. At the same time, social media infrastructures must be opened up to third-party users, preventing monopolies and limiting the addictive potential of algorithms that weaken pluralism. Finally, Big Tech lobbying must be strongly supervised and radically transparent, with an obligation to disclose which	From line 16 to 20: adoption and scaling of open and interoperable European alternatives to Big Tech. At the same time, social media infrastructures must be opened up to third-party users, preventing monopolies and limiting the addictive potential of algorithms that weaken pluralism. <u>A sovereign digital Europe also requires a strong and innovative European tech and digital ecosystem. Reducing structural dependencies and strengthening open and interoperable technologies creates fairer competition and allows European companies to develop and scale trustworthy digital solutions. By investing in open standards, secure infrastructure and transparent governance, the EU can foster an environment where European businesses compete on equal terms, drive innovation and contribute to a more resilient and democratic digital future. This also requires the consistent enforcement of EU digital legislation to curb the power of dominant platforms and ensure a level playing field for all market participants.</u> Finally, Big Tech lobbying must be strongly supervised and radically transparent, with an obligation to disclose which	Discuss: GPEW, EELV, DE Greens, FYEG, EGP Committee, SF, Livre

15	AM-19-2	Bündnis 90/Die Grünen	party users, preventing monopolies and limiting the addictive potential of algorithms that weaken pluralism. Finally, Big Tech lobbying must be strongly supervised and radically transparent, with an obligation to disclose which	<p>Insert from line 19 to 20:</p> <p>party users, preventing monopolies and limiting the addictive potential of algorithms that weaken pluralism.</p> <p><u>The era of intransparent algorithms must end. Users must have the right to determine what content is shown to them. Algorithms controlled by a handful of tech corporations increasingly priorities outrage, hate, and disinformation, while suppressing diverse and credible voices. Algorithms that give greater reach to disinformation, hate, and violence than to media working to journalistic standards are incompatible with our democracy.</u> Finally, Big Tech lobbying must be strongly supervised and radically transparent, with an obligation to disclose which</p>	<p>AM-17-3, AM-17-4, AM-19-1, AM-19-2, AM-19-2</p> <p>DE, MP, FYEG, EGP Committee, EELV, GPEW, Livre, SF</p>
16	AM-19-3	Miljöpartiet de gröna	Finally, Big Tech lobbying must be strongly supervised and radically transparent, with an obligation to disclose which political parties are targeting citizens with paid content on their platforms.	<p>Insert from line 19 to 21:</p> <p>Finally, Big Tech lobbying <u>by dominant actors within the social media infrastructures</u> must be strongly supervised and entirely radically transparent, with an obligation to disclose which political parties <u>or political actors</u> are targeting citizens with paid content on their platforms.</p>	<p>CAS accepted as amended: Finally, Big Tech lobbying must be strongly supervised and entirely transparent, with an obligation to disclose which political parties or political actors are targeting citizens with paid content on their platforms.</p>

Amendments to R4: European Digital Democracy: Sovereignty, Rights and Online Safety

No	Lines	Tabled by	Original text	Proposed amendment	CAS decision
17	AM-21-1	EGP Committee	supervised and radically transparent, with an obligation to disclose which political parties are targeting citizens with paid content on their platforms.	Insert from line 21: supervised and radically transparent, with an obligation to disclose which political parties are targeting citizens with paid content on their platforms as already the case under the Regulation on transparency and targeting of political ads.	CAS accepted
18	AM-21-2	Europa Verde - Verdi	supervised and radically transparent, with an obligation to disclose which political parties are targeting citizens with paid content on their platforms.	Insert from line 21: supervised and radically transparent, with an obligation to disclose which political parties are targeting citizens with paid content on their platforms. Generative AI technologies have rapidly advanced. These systems rely on massive datasets—often built by scraping the internet without consent and containing copyrighted, private, or sensitive material. This practice violates privacy and image rights, exposes people to identity-theft risks, and allows companies to profit from others' data. Without proper oversight, AI development risks harming many sectors, including the artistic one, and infringing on fundamental rights. It is urgent for society to regulate the deployment of this technology.	Committee, Vihreät, EVV, EELV, DE, FYEG, GPEW, Groen to discuss AM 6 and 18

Amendments to R4: European Digital Democracy: Sovereignty, Rights and Online Safety

19	AM-22-2	Miljöpartiet de gröna	2. Human impact.	In line 22: 2. <u>Clear Focus on</u> Human limpact <u>by Social Media and AI</u>	come back to titles at the very end
20	AM-22-1	Bündnis 90/Die Grünen	2. Human impact. AI-driven manipulation has direct consequences on people's lives.	Insert from line 22 to 23: <u>Digital technologies and social platforms have a profound impact on people's lives. They shape what individuals see, feel and believe, often in ways that are neither transparent nor easily controlled.</u> <u>Vulnerable groups are particularly exposed. Behavioural profiling, targeted advertising and opaque recommender systems amplify risks for people who already face discrimination or social and economic insecurity.</u> <u>Children and young people are especially at risk. European teenagers spend around three hours per day on social media, where addictive feeds increase their exposure to harmful, explicit and deceptive content. Amnesty International found that TikTok's algorithms can push self-harm and depressive content to teenage accounts within minutes.</u> <u>AI-driven manipulation has direct consequences on people's lives. Women face a disproportionate threat through deepfake abuse. Around 96 percent of deepfakes are pornographic, with more than 90 percent targeting women. This fuels harassment, blackmail and lasting psychological harm.</u> <u>These practices show that the threat is not only who owns the platforms, but how their systems operate and how they exploit emotions, vulnerabilities and even mental health for profit.</u>	EELV, GPEW, MP, DE Greens: check AM-22-1, 24-1, 27-1, 35-1, 40-1, 45-1

Amendments to R4: European Digital Democracy: Sovereignty, Rights and Online Safety

No	Lines	Tabled by	Original text	Proposed amendment	CAS decision
21	AM-24-1	Bündnis 90/Die Grünen	Studies show that 96% of deepfakes are pornographic, with over 90% targeting women. Such content, which circulates widely on platforms such as Pornhub, X, or Telegram, fuels harassment, blackmail, and trauma.	Delete from line 24 to 26: Studies show that 96% of deepfakes are pornographic, with over 90% targeting women.
