Alle-Catt Wind Farm

The Alle-Catt Wind Farm is being developed by **Invenergy** in Allegany, Cattaraugus and Wyoming Counties. The project will bring **$9.1 million** each year in added revenue to the local economies and create hundreds of jobs, while generating clean energy to meet New York's growing **electricity needs**.

Jobs in Our Community

Over 400 personnel will be employed during construction and an additional 12 permanent full time operations and maintenance jobs will be created to maintain the wind farm, all with prevailing wage.

Investment in Our Community

$9.1 million in new annual revenue for project towns and counties that will go toward schools, roads and bridges and healthcare.

Invenergy's Impact in New York

Invenergy's wind and solar projects provide reliable, sustainable energy to the Empire State while boosting local economies. Our 12 New York projects, operating and in development, have the capacity to deliver enough low-cost, sustainable energy to power 900,000 New York homes each year. We are proud to support good-paying jobs while providing the solutions to New York's energy challenges.

A New Tourism Opportunity

Wyoming County has more wind turbines than any other New York county. We encourage visitors to check out wind farm themselves to see firsthand the power of clean energy!
