Canberra Airport to conduct simulated emergency field exercise today

Canberra Airport is holding a live 'field' exercise today, Tuesday 24 October, from approximately 9am.

The purpose of the exercise is to test Canberra Airport's Emergency Plan and will involve a response from various emergency services agencies including Police, Ambulance and the Fire Brigade, to a simulated incident on the airfield at the airport.

Canberra Airport emergency responses are tested annually to develop a higher level of preparedness.

Members of the public are advised that any unusual concentration of vehicles, including emergency services personnel and vehicles at or around Canberra Airport at any time from 9am, is associated with the conduct of this exercise, and that there is no need for concern.
