

Sustainability Policy

Canberra Airport (CA) acknowledge our responsibility in climate change and promoting sustainability. CA has been at the forefront of sustainable practices and is committed to leading the nation – and the world – by aiming to be net zero by 2030 in scope 1 and scope 2 emissions. Additionally, we aim to increase the use of sustainable aviation fuel to 10% by 2030 and work collaboratively with our stakeholders towards net zero emissions by 2045 for scope 3 emissions.

CA supports the United Nations' target to limit the increase of global average temperature and aims not to exceed 1.5°C above pre-industrial levels. We also endorse the Australian Government's target of a 43% reduction of Greenhouse Gasses (GHG) by 2030 compared to 2005 levels and be net zero by 2050.

Furthermore, we support the ACT Government's target of 67-75% reduction in GHG emissions by 2050 against the 2005 levels.

Our Commitment

- Achieve net zero emissions for scope 1 and scope 2 emissions by 2030 and assist our clients with their scope 3 emissions through a robust stakeholder management plan.
- Continuously investing in sustainable initiatives, energy efficiency and renewable energy use
- Implement sustainable management of resources.
- Appropriate management of matters of natural, Indigenous and heritage value.
- Identify, prevent, control and minimise sustainable performance impacts associated with our operations.
- Constantly improve sustainability management, consequences and activities.
- Integrate sustainability management issues with our operating procedures.
- Lead and promote our commitment to sustainable management to all stakeholders including employees, clients, adjacent landholders, and the community.
- Measure, monitor and report on sustainability issues arising from our operations to facilitate constant improvement.
- Monitor, respond to, and comply with relevant Australian and international legislation.
- Conform to relevant Australian and international standards.

- Provide training and support for all employees to implement sustainable practices within the workplace.

Stephen Byron
Chief Executive officer
