Our Brand

Happy & Healthy Spaces Around the World

Since 2007, our driving force has been to produce effective and high-quality acoustic solutions, lighting, and furniture solutions suited for all environments — from offices to homes and restaurants to learning spaces.

Our multifaceted plug-and-play solutions are both functional and inspiring, while helping to reduce excessive noise so people can feel more focused, less stressed, and thrive better in their environments. This, in turn, has fueled our mission of creating happy and healthy spaces along with increasing the well-being of people worldwide.

We Care

Make It Sustainable

Our first BuzziProducts came to life from recycled and recyclable materials, both of which are good for acoustics and the planet. We are conscious of our environmental impact and will collaborate to achieve continuous improvements in

lowering our carbon footprint. In the long run, we would like to produce less waste in order to create a sustainable future for our people, customers, and communities. This is why we invest in handcrafting durable products with high-quality materials.

Craftsmanship

We Have Over 100 Years of Combined Expertise

We believe in craftsmanship and take pride in the details. With over 100 years of combined experience, our hardworking team pieces together our celebrated solutions, most of them by hand, with an eye for detail and great

precision daily. The longevity of materials used, acoustic properties, and aesthetics are our guiding principles in everything we do. With craftsmanship and timeless design at the forefront, we aim to create products that last.

Innovation

We Believe in Creativity Without Boundaries

In our quest to create boundary-pushing acoustic solutions to meet the ever-changing needs of the modern workspace, our passionate in-house design team, BuzziSpace Studio, is fully committed to innovation.

We additionally collaborate with internationally renowned designers to go beyond what is expected in the design world. Rest assured, we are continuously progressing and innovating to meet our challenges.

Our Recognitions

Award-Winning Creative Solutions

We take great pride in the products that we design, focusing on craftsmanship and high-quality materials, so it's always a delight to be recognized and honored for our achievements. Through the years, we have won over 70 international awards.

Acoustic Principles

To create a better acoustical environment and reduce reverberation time in a room, BuzziSpace products are developed to perform on one or more of the following acoustic principles.

Absorption

Sound waves are absorbed by any 'acoustically soft' material they encounter.

Sound is energy, and in order to stop this energy from propagating, absorptive panels help to convert this energy into heat through friction. The absorption coefficient of a product will determine the level and quality of absorption. Absorption applies to a fixed wall or ceiling element.

Diffusion

Sound energy is spread evenly in a given space.

Wavelengths that cannot be absorbed through acoustic treatment will scatter evenly back into the room, ensuring a better spread while maintaining a live, vivid sound. This principle can be obtained by alternating different depths of absorptive material and 3D shapes in the room.

Attenuation

Reducing the sound transfer within a room.

In order to reduce sound transfer between different spaces, vertical elements will be applied to cut down sound energy. These solutions can come in different shapes such as sound blocks, vertical ceiling panels, room dividers and desk screens. Attenuation or sound dampening has a positive impact on speech intelligibility and clarity.

Acoustic Performance

The wavelength determines the sound frequency. It is measured as the number of repetitive vibrations per cycle per second and is expressed in Hertz. The audible range of sound is between 20 to 20,000 Hz. The higher the frequency, the higher the tone.

Low Tones
Long wave - Low frequency
(50 - 250 Hz)

E.g. heating systems, ventilation, elevators, copy machines, and server rooms.

Mid Tones
Mid length wave - Speech frequency
(250 - 2500 Hz)

E.g. speech, vowels, and consonants.

High Tones
Short wave - High frequency
(2500 - 12000 Hz)

E.g. ringtones, typing sounds, clicking sounds, and children's speech.

Reverberation Time

It is the time needed for an original sound source to decay to 60 dB and it is expressed in seconds. In order to generate excellent speech intelligibility and clarity, the reverberation time should be adjusted and balanced using absorptive material in the function of specific acoustical issues in a given space.

Recommended Reverberation Times:	
Office:	0.75s
Meeting room:	0.60s
Cafeteria:	1.00s
Gymnasium:	1.50s
Auditorium:	1.50s to 2.00s

WOOD

Antwerp Oak

Properties Oak Solid wood with a subtle rustic look, allowing some pith and small cracks.
Maintenance First, wipe the surface with a dry cloth then clean carefully with a damp cloth. Do not use any abrasive cleaning products or scourers as this can damage the surface.

Ash Natural

Properties Clear coating with a matt varnish look, consisting of a durable finish, suitable for furniture, that masks normal wear and leaves the wood grain visible to the eye.
Maintenance First, wipe the surface with a dry cloth then clean carefully with a damp cloth. Do not use any abrasive cleaning products or scourers as this can damage the surface.

Ash Walnut Stained

Properties Oil based coating with walnut colored pigments consisting of durable finish, suitable for furniture, that masks normal wear and leaves the wood grain visible to the eye.
Maintenance First, wipe the surface with a dry cloth then clean carefully with a damp cloth. Do not use any abrasive cleaning products or scourers as this can damage the surface.

Oak

Properties Clear coating with a matt varnish look, consisting of a durable finish, suitable for furniture, that masks normal wear and leaves the wood grain visible to the eye.
Maintenance First, wipe the surface with a dry cloth then clean carefully with a damp cloth. Do not use any abrasive cleaning products or scourers as this can damage the surface.

Ash Black Stained

Properties Black clear coating with a matt look, consisting of a durable finish, suitable for furniture, that masks normal wear and leaves the wood grain visible to the eye.
Maintenance First, wipe the surface with a dry cloth then clean carefully with a damp cloth. Do not use any abrasive cleaning products or scourers as this can damage the surface.

Ash White Wash

Properties Oil based coating with white pigments consisting of durable finish, suitable for furniture, that masks normal wear and leaves the wood grain visible to the eye.
Maintenance First, wipe the surface with a dry cloth then clean carefully with a damp cloth. Do not use any abrasive cleaning products or scourers as this can damage the surface.

Cumaru

Properties Tropical hardwood which is more resistant to weather influences. No oil or varnish is applied. In normal use, wood will turn grey over time.
Maintenance Aftermarket teak cleaning product can be used for yearly maintenance to freshen up the wood after winter. Do not use any abrasive cleaning product or scourers as this can damage the wood. Cumaru wood is naturally durable but may be prone to movement and cracking in outdoor environments.

Walnut

Properties Clear coating with a matt varnish look, consisting of a durable finish, suitable for furniture, that masks normal wear and leaves the wood grain visible to the eye.
Maintenance First, wipe the surface with a dry cloth then clean carefully with a damp cloth. Do not use any abrasive cleaning products or scourers as this can damage the surface.

Refinishing should be done by a specialist in furniture coating.
It requires sanding of the parts and re-applying an equal amount of coating on all sides.

White or black Laminate

Properties HPL top layer with plywood core and straight oiled visible plywood edge
Maintenance Depending on the stains/dirt there are different prescriptions: LIGHT: dry or damp paper towels, a cloth or sponge. NORMAL: with a cloth or soft nylon brush and washing powder, soft soap, toilet soap or washing-up liquid. If necessary, leave for a while and then rinse thoroughly with clean water. HEAVY: Discoloration stains through long exposure to tea, coffee, etc. use washing powder and household bleach (but do not repeat too often). For stains such as lead pencil, felt-tip pens, marker and ball-point pens use an organic solvent for example acetone (nail varnish remover).

Ash Lacquered

Properties Lacquered coating with matt look, leaving a visual wood grain.
Maintenance First clear the surface with a dry cloth, then clean with a slightly damp cloth. Do not use abrasive cleaning products nor scourers, they can damage the surface.
