The Art of Illusion

BuzziMirage is about reflections, false perspectives and fake shadows. The mirrors act as a “trompe l’oeil” since they are based on false impressions and confused perceptions. “It’s a discussion between materials, reality and virtuality. But, above all BuzziMirage is about creating a little world of its own,” says designer Alain Gilles. The offset between the arch-shaped mirror and its support creates sense of depth and false impression that a door or window is open. The design combines various materials —a metal arched frame, paired with a glass mirror—to play with depth and light, creating new vanishing points.
