CALCULATION MODEL

This Model for calculating purchase and sale prices is a part of the Trading Program for J&T ARCH INVESTMENTS SICAV, a.s. investment shares from **3 May 2024** (the "Trading Program").

This Model builds on the Trading Program and can be used and interpreted only jointly with the Trading Program.

1. INTRODUCTION

1.1. Definition of terms

1.1.1. The terms defined in the Trading Program are also fully applicable to this Model.

1.1.2. **"CZK H"** means "CZK H investment shares" issued by J&T ARCH, ISIN: CZ0008044856.

1.1.3. **"CZK HD"** means "CZK HD investment shares" issued by J&T ARCH, ISIN: CZ0008050317.

1.1.4. **"EUR H"** means "EUR H investment shares" issued by J&T ARCH, ISIN: CZ0008044864.

1.1.5. **"Day T"** means a given day for which the purchase and sale prices of investment shares are calculated.

1.1.6. **"Day T-1"** means the trading day on the Regulated Market immediately preceding a Day T.

1.1.7. **"Investment Shares"** means CZK H, CZK HD and EUR H.

1.2. Basic description of the Model

1.2.1. On the basis of the Model, prices are calculated for which J&T SECURITIES will submit Orders to purchase or sell in relation to Investment Shares on the Regulated Market. The calculated prices do not represent an estimate of the Investments Shares' value.

1.2.2. Certain Model outputs will be published on the website, primarily:

1.2.2.1. purchase and sale prices for each class of Investment Shares as of Day T;

1.2.2.2. limits and allocations;

1.2.2.3. assumed appreciations of individual assets of J&T ARCH.

1.2.3. Investment Shares' purchase and sale prices calculated by the Model shall be published on the website on the Day T prior to the beginning of trading (auction) of the Investment Shares on the Regulated Market. Calculations are made using the data valid as of Day T-1.

1.2.4. The Model calculates purchase and sale prices individually for each type of Investment Share.

1.2.5. This version of the Model of the Trading Program from 3 May 2024 is effective from 6 May 2024.

2. MODEL CALCULATIONS

2.1. Calculation principles

2.1.1. In case of CZK H and EUR H the Model calculates prices to 4 decimal places rounded up and in case of CZK HD to 2 decimal places rounded up. The purchase prices of CZK H and EUR H will be rounded up to 2 decimal places and sale prices of CZK H and EUR H will be rounded

J&T SECURITIES MANAGEMENT PLC   Klimentos 41–43, Klimentos Tower, 1st floor, office 18,   www.jt-securities.com
1061 Nicosia, Cyprus

1/12

down to 2 decimal places. The purchase prices of CZK HD will be rounded up to whole units and sale prices of CZK HD will be rounded down to whole units.

2.1.2. Purchase price is calculated as 87 % of selling price.

2.1.3. The Model is based on the assets structure of J&T ARCH as last announced by J&T ARCH or another authorized entity. Changes in J&T ARCH's assets shall be taken into account in the Model, but J&T SECURITIES has the right to adjust the Model or terminate the Trading Program, particularly if the changes will be to a large extent, were not possible to predict with respect to circumstances, or the Model is not configured in accordance with their extent.

2.1.4. The basic principle of the Model calculation is based on the value of Investment Shares as of the last day of the preceding quarter, adjusted with respect to:

2.1.4.1. assets appreciation calculated by the Model by individual asset categories or individual assets (see part 2.3 below);

2.1.4.2. estimated costs calculated by the Model (see part 2.4 below);

2.1.4.3. interest rate differential in relation to distribution of appreciation between Investment shares denominated in CZK and Investment shares denominated in EUR (see part 2.5 below).

2.1.5. The following rules and interpretation principles shall be applied in the Model calculations:

2.1.5.1. If the Model uses "current date," it means Day T-1.

2.1.5.2. If the Model uses "current value" or "current price," it means the last publicly available price, value, or other figure valid as of Day T-1, and if such figure is not known for any given Day T-1, the last previously known figure shall be used.

2.1.5.3. If the Model uses "accruals," it means calculating the relevant value on the basis of the actual days elapsed in a given calendar quarter, i.e., the value as of the first day of the calendar quarter relative to the value as of the current date.

2.1.5.4. If the Model uses price as of a day other than Day T or T-1, for example as of the end of a calendar quarter, and the figure for the given day is not known (whether from a regulated market or from a relevant issuer), the last known price shall be used, which shall be calculated as of the last day of the preceding calendar quarter using the same principles and procedures as for the Model.

2.2. Calculation formulas

2.2.1. The CZK H selling price shall be calculated by the following formula:

$$CZK\ H_{t-1} = CZK\ H_{q-1} * \left(1 + \frac{\sum\{Z1_{t-1}, Z2_{t-1}, \ldots, Z12_{t-1}\} - PN_{t-1}}{SA_{q-1}} + D * \frac{T_{t-1}}{T_q}\right)$$

Where:

$CZK\ H_{t-1}$ is the CZK H price as of the current date

$CZK\ H_{q-1}$ is the CZK H price as of the last day of the preceding calendar quarter

J&T SECURITIES MANAGEMENT PLC   Klimentos 41–43, Klimentos Tower, 1st floor, office 18,   www.jt-securities.com
1061 Nicosia, Cyprus

2/12

Z is the appreciation of the sum of assets in CZK according to paragraphs 3.1 through 3.12 as of the current date

PN_{t-1} is the estimated costs in CZK as of the current date

D is the interest rate differential in % p.q. in accordance with para. 2.5

SA_{q-1} is the balance sheet total of J&T ARCH in CZK as of the end of the preceding calendar quarter

T_{t-1} is the number of days between the current date and the beginning of the calendar quarter

T_q is the total number of days in the current calendar quarter

2.2.2.   The EUR H selling price shall be calculated by the following formula:

$$EUR\ H_{t-1} = EUR\ H_{q-1} * \left(1 + \frac{\sum\{Z1_{t-1}, Z2_{t-1}, \ldots, Z12_{t-1}\} - PN_{t-1}}{SA_{q-1}}\right)$$

Where:

$EUR\ H_{t-1}$ is the EUR H price as of the current date

$EUR\ H_{q-1}$ is the EUR H price valid as of the last day of the preceding calendar quarter

Z is the appreciation of the sum of assets in CZK according to paragraphs 3.1 through 3.12 as of the current date

PN_{t-1} is the estimated costs in CZK as of the current date

SA_{q-1} is the balance sheet total of J&T ARCH in CZK as of the end of the preceding calendar quarter

2.2.3.   The CZK HD selling price shall be calculated by the following formula:

$$CZK\ HD_{t-1} = CZK\ HD_{q-1} * \left(1 + \frac{\sum\{Z1_{t-1}, Z2_{t-1}, \ldots, Z12_{t-1}\} - PN_{t-1}}{SA_{q-1}} + D * \frac{T_{t-1}}{T_q}\right) - DIV$$

Where:

$CZK\ H_{t-1}$ is the CZK HD price as of the current date

$CZK\ H_{q-1}$ is the CZK HD price as of the last day of the preceding calendar quarter

Z is the appreciation of the sum of assets in CZK according to paragraphs 3.1 through 3.12 as of the current date

PN_{t-1} is the estimated costs in CZK as of the current date

D is the interest rate differential in % p.q. in accordance with para. 2.5

SA_{q-1} is the balance sheet total of J&T ARCH in CZK as of the end of the preceding calendar quarter

T_{t-1} is the number of days between the current date and the beginning of the calendar quarter

T_q is the total number of days in the current calendar quarter

J&T SECURITIES MANAGEMENT PLC   Klimentos 41–43, Klimentos Tower, 1st floor, office 18,   www.jt-securities.com
                                       1061 Nicosia, Cyprus

3/12

DIV is the sum of all paid shares in profit from one CZK HD and receivables under the right to share in profit per one CZK HD included in the formula from the first day CZK HD are traded without the right to share in profits (in CZK)

2.3. Calculated appreciation of assets

2.3.1. For each asset in J&T ARCH (differentiated by asset category), the Model determines current price and expected performance (appreciation which may or may not be negative, i.e. depreciation) and calculates the appreciation as of the current date.

2.3.2. In case of assets (securities) traded on a regulated market:

2.3.2.1. the current price will be determined as the last price reached on the relevant regulated market (e.g., the regulated market organized by the Prague Stock Exchange, hereinafter referred to as the **"PSE,"** or the New York Stock Exchange, hereinafter referred to as the **"NYSE"**), unless expressly stated otherwise;

2.3.2.2. the expected appreciation will be calculated as the ratio of the price reached on the regulated market as of Day T-1 to the price reached on the regulated market as of the last day of the preceding quarter.

2.3.3. In case of assets (securities) of collective investing not accepted for trading on a regulated market

2.3.3.1. the current price will be determined as the last current value (NAV) announced by the manager of the given investment fund or by another authorized entity, unless expressly stated otherwise;

2.3.3.2. the expected appreciation will be calculated with respect to the specific asset (typically on the basis of results historically achieved, unless stated otherwise) and the Model will accrue it.

2.3.4. In case of other assets:

2.3.4.1. the current price will be determined with respect to the specific asset (typically according to publicly available information, or according to an estimate);

2.3.4.2. the expected appreciation will be determined with respect to the specific asset and the Model will accrue it.

2.3.5. In part 3 below, we present examples of appreciation calculations in accordance with the principles and processes as set out above in relation with the specific assets.

2.4. Estimated costs

2.4.1. Ongoing costs taken each year for management and administration of the fund presented in the half-yearly financial report of J&T ARCH for Q2/2023 and accrued. The Model shall calculate these costs as of the current date according to the following formula:

$$PN_{t-1} = FK_{q-1} * NP_\% * \frac{1}{4} * \frac{T_{t-1}}{T_q}$$

J&T SECURITIES MANAGEMENT PLC   Klimentos 41–43, Klimentos Tower, 1st floor, office 18,   www.jt-securities.com
1061 Nicosia, Cyprus

4/12

Where:

PN_{t-1} is the operating cost in CZK as of the current date

FK_{q-1} is the current value of the fund capital of J&T ARCH as of the end of the preceding calendar quarter

$NP_\%$ is the sum of annual amount of costs of management and administration of the fund in % as indicated in the half-yearly financial report of J&T ARCH for Q2/2023

T_{t-1} is the number of days between the current date and the beginning of the calendar quarter

T_q is the total number of days in the current calendar quarter

DIV is a share in profit claim corresponding to the number of MMB shares included in the formula from the first day the shares are traded without a share in profit claim

2.5. Interest rate differential

2.5.1. J&T ARCH issues Investment shares denominated in CZK and in EUR. J&T SECURITIES assumes that (i) all assets of J&T ARCH are denominated in euro and (ii) J&T ARCH hedges the opened currency position using financial derivatives.

2.5.2. Under the assumptions stated in 2.5.1, J&T SECURITIES uses simplification in the Model inasmuch as the appreciation of EUR H is calculated at the level of the appreciation of J&T ARCH and the appreciation of CZK H, resp. CZK HD is increased by an interest rate differential defined as the difference between 3M EURIBOR and 3M PRIBOR rates valid as of the end of the previous quarter. Accrued as defined in the formulas.

3. CALCULATIONS OF INDIVIDUAL ASSETS' APPRECIATIONS

3.1. J&T ALLIANCE SICAV, a.s. – investment shares

3.1.1. Current price: product of all assets of J&T ARCH and share (in %) of this asset in all assets pursuant to the J&T ARCH letter to investors for Q4/2023.

3.1.2. Assumed appreciation: 14 % p.a. J&T SECURITIES determines the assumed appreciation of this asset on the level of the appreciation of this asset for year 2023 that pursuant to the J&T ARCH letter to investors for Q4/2023 reached the maximum level (i.e. 15,29%), which conservatively lowers by 1.29%. J&T SECURITIES uses compound interest to convert to quarterly appreciation. In the Model, this asset was increased by the end of Q1/2024 according to the Notice on the amount of the primary subscription by J&T ARCH for Q1/2024.

3.1.3. The Model shall calculate the appreciation of this asset as of the current date according to the following formula:

$$Z1_{t-1} = NAV * PZ_{t-1} * \frac{T_{t-1}}{T_q}$$

Where:

$Z1_{t-1}$ is the appreciation of this asset in CZK as of the current date

NAV is current price in accordance with para. 3.1.1

J&T SECURITIES MANAGEMENT PLC   Klimentos 41–43, Klimentos Tower, 1st floor, office 18,   www.jt-securities.com
1061 Nicosia, Cyprus

5/12

PZ_{t-1} is the assumed appreciation in % p.q. as of the current date in accordance with para. 3.1.2

T_{t-1} is the number of days between the current date and the beginning of the calendar quarter

T_q is the total number of days in the current calendar quarter

3.2. **MYTHESA HOLDINGS LIMITED** – fully owned subsidiary (SPV) owning MONETA Money Bank, a.s. shares, ISIN: CZ0008040318, (**"MMB"**)

3.2.1. Current price: price of MMB from the PSE in accordance with para. 2.3.2 multiplied the quantity of MMB shares owned by MYTHESA HOLDINGS LIMITED minus value of debt financing by loan as per para. 3.2.2.

3.2.2. Assumed appreciation: the appreciation of MMB's shares according to paragraph 2.3.2. MYTHESA HOLDING LIMITED owns 11,43 % of MMB shares as of 31 December 2023. According to publicly provided information, J&T ARCH purchased share in EMMA APLHA HOLDING partly with monetary means provided by MYTHESA HOLDING LIMITED which, for this purpose, accepted a loan approximately in amount of EUR 75 million with an interest rate of 5,6% p.a. For the Model, J&T SECURITIES assumes it happened as to 31 March 2024. The Model adjusts the assumed appreciation for the cost of debt in the amount of quarterly accrued interest.

3.2.3. The Model shall calculate the appreciation of this asset as of the current date according to the following formula:

$$Z2_{t-1} = PA * (CA_{t-1} - CA_{q-1}) - ND_q * \frac{T_{t-1}}{T_q} + DIV$$

Where:

$Z2_{t-1}$ is the appreciation of this asset in CZK as of the current date

PA is the quantity of MMB shares owned by MYTHESA HOLDINGS LIMITED

CA_{t-1} is the price of an MMB share as of the current date

CA_{q-1} is the price of an MMB share as of the last day of the preceding calendar quarter

ND_q is the interest cost in CZK for relevant calendar quarter

T_{t-1} is the number of days between the current date and the beginning of the calendar quarter

T_q is the total number of days in the current calendar quarter

DIV is the paid share in profits of MMB shares in the current calendar quarter or claim corresponding to the number of MMB shares included in the formula from the first day the MMB shares are traded without a share in profit claim, with the fact that the money paid out as a result of the right to share in profits remains in the calculation of the appreciation of this asset and the assumption that it does not bear interest (if not published otherwise)

J&T SECURITIES MANAGEMENT PLC   Klimentos 41–43, Klimentos Tower, 1st floor, office 18,   www.jt-securities.com
1061 Nicosia, Cyprus

6/12

3.3. **BHP HOTELS SICAV a.s.** – investment shares

3.3.1. Current price: product of all assets of J&T ARCH and share (in %) of this asset in all assets pursuant to the J&T ARCH letter to investors for Q4/2023.

3.3.2. Assumed appreciation: 10% p.a. J&T SECURITIES determines the assumed appreciation of this asset according to its conservative professional judgment while taking into account, among other things, the required yields mentioned at the conference for investors held on 21 December 2023. J&T SECURITIES uses compound interest to convert to quarterly appreciation.

3.3.3. The Model shall calculate the appreciation of this asset as of the current date according to the following formula:

$$Z3_{t-1} = NAV * PZ_{t-1} * \frac{T_{t-1}}{T_q}$$

Where:

$Z3_{t-1}$ is the appreciation of this asset in CZK as of the current date

NAV is current price in accordance with para. 3.3.1

PZ_{t-1} is the assumed appreciation in % p.q. as of the current date in accordance with para. 3.3.2

T_{t-1} is the number of days between the current date and the beginning of the calendar quarter

T_q is the total number of days in the current calendar quarter

3.4. **JTFG FUND I SICAV, a.s.** – investment shares

3.4.1. Current price: product of all assets of J&T ARCH and share (in %) of this asset in all assets pursuant to the J&T ARCH letter to investors for Q4/2023.

3.4.2. Assumed appreciation: appreciation of ČEZ, a. s. shares, ISIN: CZ0005112300, (**"ČEZ"**) in accordance with para. 2.3.2. J&T ARCH owns 40% of the investment shares in JTFG FUND I SICAV, which itself owns 860,000 shares of ČEZ. J&T SECURITIES has no relevant information about other assets in this fund and therefor leaves their appreciation at 0%. Assumed appreciation is based only on prices of ČEZ shares and does not take into account any other assets in the fund.

3.4.3. The Model shall calculate the appreciation of this asset as of the current date according to the following formula:

$$Z4_{t-1} = \left[PA * (CA_{t-1} - CA_{q-1}) + DIV \right] * SHA$$

Where:

$Z4_{t-1}$ is the appreciation of this asset in CZK as of the current date

PA is the quantity of ČEZ shares owned by JTFG FUND I SICAV

CA_{t-1} is the price of a ČEZ share as of the current date

CA_{q-1} is the price of a ČEZ share as of the last day of the preceding calendar quarter

J&T SECURITIES MANAGEMENT PLC   Klimentos 41–43, Klimentos Tower, 1st floor, office 18,   www.jt-securities.com
                                          1061 Nicosia, Cyprus

7/12

DIV is the share in profits of ČEZ shares paid in the current calendar quarter or share in profit claim corresponding to the number of ČEZ shares included in the formula from the first day the shares are traded without a share in profit claim, with the fact that the money paid out as a result of the right to share in profits remains in the calculation of the appreciation of this asset and the assumption that it does not bear interest (if not published otherwise)

SHA is the share of J&T ARCH on the asset in accordance with para. 3.4.2

3.5. Sandberg Private Equity 2 Fund – investment shares

3.5.1. Current price: product of all assets of J&T ARCH and share (in %) of this asset in all assets pursuant to the J&T ARCH letter to investors for Q4/2023.

3.5.2. Assumed appreciation: 8% p.a. J&T SECURITIES determines the assumed appreciation of this asset according to its professional judgment while taking into account, among other things, the character of a given asset and the fund's previous performance. J&T SECURITIES uses compound interest to convert to quarterly appreciation.

3.5.3. The Model shall calculate the appreciation of this asset as of the current date according to the following formula:

$$Z5_{t-1} = NAV * PZ_{t-1} * \frac{T_{t-1}}{T_q}$$

Where:

$Z5_{t-1}$ is the appreciation of this asset in CZK as of the current date

NAV is current price in accordance with para. 3.5.1.

PZ_{t-1} is the assumed appreciation in % p.q. as of the current date in accordance with para. 3.5.2

T_{t-1} is the number of days between the current date and the beginning of the calendar quarter

T_q is the total number of days in the current calendar quarter

3.6. EMMA APLHA HOLDING – share

3.6.1. Current price: value pursuant to the J&T ARCH letter to investors for Q4/2023. For the purposes of the Model, J&T SECURITIES calculates with this asset in the property of J&T ARCH as of 31 March 2024.

3.6.2. Assumed appreciation: 13% p.a. J&T SECURITIES determines the assumed appreciation of this asset according to its professional judgment at the lower limit of the range mentioned at the conference for investors held on 25 March 2024. J&T SECURITIES uses compound interest to convert to quarterly appreciation.

3.6.3. The Model shall calculate the appreciation of this asset as of the current date according to the following formula:

J&T SECURITIES MANAGEMENT PLC   Klimentos 41–43, Klimentos Tower, 1st floor, office 18,   www.jt-securities.com
                                        1061 Nicosia, Cyprus

8/12

$$Z6_{t-1} = NAV * PZ_{t-1} * \frac{T_{t-1}}{T_q}$$

Where:

$Z6_{t-1}$ is the appreciation of this asset in CZK as of the current date

NAV is current price in accordance with para. 3.6.1

PZ_{t-1} is the assumed appreciation in % p.q. as of the current date in accordance with para. 3.6.2

T_{t-1} is the number of days between the current date and the beginning of the calendar quarter

T_q is the total number of days in the current calendar quarter

3.7.   J&T PROPERTY OPPORTUNITIES SICAV, a.s. – investment shares

3.7.1. Current price: product of all assets of J&T ARCH and share (in %) of this asset in all assets pursuant to the J&T ARCH letter to investors for Q4/2023.

3.7.2. Assumed appreciation: 8% p.a. J&T SECURITIES determines the assumed appreciation of this asset according to its professional judgment while taking into account, among other things, the character of a given asset and the fund's previous performance. J&T SECURITIES uses compound interest to convert to quarterly appreciation.

3.7.3. The Model shall calculate the appreciation of this asset as of the current date according to the following formula:

$$Z7_{t-1} = NAV * PZ_{t-1} * \frac{T_{t-1}}{T_q}$$

Where:

$Z7_{t-1}$ is the appreciation of this asset in CZK as of the current date

NAV is current price in accordance with para. 3.7.1

PZ_{t-1} is the assumed appreciation in % p.q. as of the current date in accordance with para. 3.7.2

T_{t-1} is the number of days between the current date and the beginning of the calendar quarter

T_q is the total number of days in the current calendar quarter

3.8.   Other investments – loan to Sandberg Private Equity 1 Fund, *limited partnership* in Sandberg Investment Fund II SCSp and investment shares in J&T MS 1 SICAV a.s.

3.8.1. Current price: product of all assets of J&T ARCH and share (in %) of this asset in all assets pursuant to the J&T ARCH letter to investors for Q3/2023.

3.8.2. Assumed appreciation: 7 % p.a. J&T SECURITIES determines the assumed appreciation of this asset according to its professional judgment while taking into account, among other things, the character of a given asset. J&T SECURITIES uses compound interest to convert to quarterly

J&T SECURITIES MANAGEMENT PLC   Klimentos 41–43, Klimentos Tower, 1st floor, office 18,   www.jt-securities.com
                                                        1061 Nicosia, Cyprus

9/12

appreciation.

3.8.3. The Model shall calculate the appreciation of this asset as of the current date according to the following formula:

$$Z8_{t-1} = NAV * PZ_{t-1} * \frac{T_{t-1}}{T_q}$$

Where:

$Z8_{t-1}$ is the appreciation of this asset in CZK as of the current date

NAV is current price in accordance with para. 3.8.1;

PZ_{t-1} is the assumed appreciation in % p.q. as of the current date in accordance with para. 3.8.2

T_{t-1} is the number of days between the current date and the beginning of the calendar quarter

T_q is the total number of days in the current calendar quarter

3.9. **J&T Private Equity B.V.** – promissory notes

3.9.1. Current price: product of all assets of J&T ARCH and share (in %) of this asset in all assets pursuant to the J&T ARCH letter to investors for Q4/2023.

3.9.2. Assumed appreciation: determined as the 1Y EURIBOR rate valid as of the last day of the previous calendar quarter and increased by a margin of 1.5%. J&T SECURITIES determines the assumed appreciation of this asset according to its professional judgment while taking into account, among other things, the character of given asset and the interest margins applied to similar assets. In the Model this asset was increased by the end of Q1/2024 by EUR 85 million according to the Notice on the amount of the primary subscription by J&T ARCH INVESTMENTS for Q1/2024.

3.9.3. The Model shall calculate the appreciation of this asset as of the current date according to the following formula:

$$Z9_{t-1} = NAV * PZ_{t-1} * \frac{T_{t-1}}{T_q}$$

Where:

$Z9_{t-1}$ is the appreciation of this asset in CZK as of the current date

NAV is current price accordance with para. 3.9.1

PZ_{t-1} is the assumed appreciation in % p.q. as of the current date in accordance with para. 3.9.2

T_{t-1} is the number of days between the current date and the beginning of the calendar quarter

T_q is the total number of days in the current calendar quarter

J&T SECURITIES MANAGEMENT PLC   Klimentos 41–43, Klimentos Tower, 1st floor, office 18,   www.jt-securities.com
1061 Nicosia, Cyprus

10/12

3.10. **J&T ACRICULTURE SICAV a.s.** – investment shares

3.10.1. Current price: product of all assets of J&T ARCH and share (in %) of this asset in all assets pursuant to the J&T ARCH letter to investors for Q4/2023.

3.10.2. Assumed appreciation: 10.5% p.a. corresponds to an interest rate on mezzanine financing provided by J&T AGRICULTURE SICAV a.s. to JTZE (J&T Zemědělství a Ekologie) group. J&T SECURITIES uses compound interest to convert to quarterly appreciation.

3.10.3. The Model shall calculate the appreciation of this asset as of the current date according to the following formula:

$$Z10_{t-1} = NAV * PZ_{t-1} * \frac{T_{t-1}}{T_q}$$

Where:

$Z10_{t-1}$ is the appreciation of this asset in CZK as of the current date

NAV is current price in accordance with para. 3.10.1

PZ_{t-1} is the assumed appreciation in % p.q. as of the current date in accordance with para. 3.10.2

T_{t-1} is the number of days between the current date and the beginning of the calendar quarter

T_q is the total number of days in the current calendar quarter

3.11. **J&T REAL ESTATE INVESTMENTS PLC** – loan

3.11.1. Current price: product of all assets of J&T ARCH and share (in %) of this asset in all assets pursuant to the J&T ARCH letter to investors for Q4/2023.

3.11.2. Assumed appreciation: 8,0% p.a. pursuant to the information provided at the conference for investors held on 25 March 2024. J&T SECURITIES uses compound interest to convert to quarterly appreciation.

3.11.3. The Model shall calculate the appreciation of this asset as of the current date according to the following formula:

$$Z11_{t-1} = NAV * PZ_{t-1} * \frac{T_{t-1}}{T_q}$$

Where:

$Z11_{t-1}$ is the appreciation of this asset in CZK as of the current date

NAV is current price in accordance with para. 3.11.1

PZ_{t-1} is the assumed appreciation in % p.q. as of the current date in accordance with para. 3.11.2

T_{t-1} is the number of days between the current date and the beginning of the calendar quarter

T_q is the total number of days in the current calendar quarter

11/12

3.12. Cash and other

3.12.1. Current price: the difference between the total value of all assets of J&T ARCH pursuant to the J&T ARCH letter to investors for Q4/2023 and the value of assets in paragraphs 3.1 through 3.11 as of the end of Q4/2023 calculated by J&T SECURITIES, which approximately corresponds to the product of all assets of J&T ARCH and share (in %) of this asset in J&T ARCH pursuant to the J&T ARCH letter to investors for Q4/2023.

3.12.2. Assumed appreciation: determined as 1D €STR valid as of the end of the previous calendar quarter rounded to two decimal places. In the Model, the estimated cash at the end of Q1/2024 was reduced by an investment of EUR 25 million in EMMA ALPHA HOLDING (according to the J&T ARCH letter to investors for Q4/2024, EUR 75 million was provided by MYTHESA HOLDINGS LIMITED, which accepted a loan for this purpose). J&T SECURITIES assumes that at the end of Q1/2024 the cash was increased by the difference between the total subscriptions of J&T ARCH investment shares for Q1/2024 and new investments of J&T ARCH in J&T ALLIANCE SICAV, a.s. and J&T Private Equity B.V. promissory notes in accordance with the Notice on the amount of the primary subscription of J&T ARCH for Q1/2024.

3.12.3. The Model shall calculate the appreciation of this asset as of the current date according to the following formula:

$$Z11_{t-1} = NAV * PZ_{t-1} * \frac{T_{t-1}}{T_q}$$

Where:

$Z11_{t-1}$ is the appreciation of this asset in CZK as of the current date

NAV is current price in accordance with para. 3.12.1

PZ_{t-1} is the assumed appreciation in % p.q. as of the current date in accordance with para. 3.12.2

T_{t-1} is the number of days between the current date and the beginning of the calendar quarter

T_q is the total number of days in the current calendar quarter

4. NOTICE

4.1.1. All information and opinions contained herein or used in the Model are from or based upon sources that J&T SECURITIES believes to be reliable. Nevertheless, J&T SECURITIES does not hereby assume any warranty as to their accuracy or completeness, although J&T SECURITIES does assume that they have been published so as to provide an accurate, complete, and undistorted representation of the facts.

4.1.2. The publication of the Model is intended to eliminate any risk of market disruption in relation to Investment Shares.
