

# USE YOUR DATA YOUR WAY

## Learn How To Control Your Data Usage

### Part 3

#### 1. Out-of-Bundle (OOB) Data and No Data Plan

- OOB data refers to data usage that exceeds your plan's data allowance whether it is a standalone Data plan or a Combo. OOB Data is also using data without activating a plan. These will result in additional charges from your carrier.
- When using the internet or apps if you do not have a data plan, out of bundle (OOB) rates will apply.
- Enabling OOB will help prevent unexpected charges to your credits.

#### How to control OOB Data Usage:

- Dial \*777# for the data menu
- Choose Option 4 (Block/Unblock OOB)
- Press 1 to Block OOB
- Press 1 again to proceed and await SMS confirmation.
- Alternatively you can request OOB Blocking Activation by calling 123

#### 2. Switch Data On/Off as Needed

- To browse or access the internet switch mobile data On and after browsing remember to switch mobile data Off.

#### 3. Disable Background App Refresh

- iOS: Go to Settings > General > Background App Refresh and select Off or Wi-Fi only.
- Android: Go to Settings > Apps & notifications > App info > [Select App] > Data usage > Background data and toggle it off.

#### 4. Turn Off Automatic Updates

- iOS: Go to Settings > App Store and toggle off App Updates.
- Android: Go to Google Play Store > Menu > Settings > Auto-update apps and select Don't auto-update apps.

#### 5. Manage Location Services

- iOS: Go to Settings > Privacy > Location Services and adjust permissions for each app.
- Android: Go to Settings > Location and select App permissions to manage location access.
