

Roller Banner – Setting Up

1

Rotate the feet/foot on the underside of the cannister.

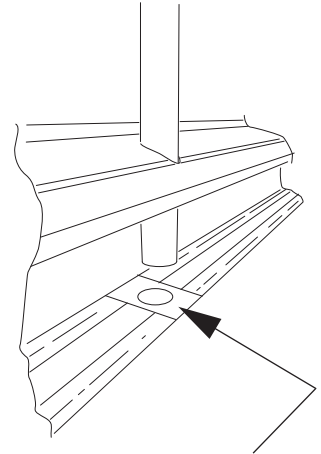

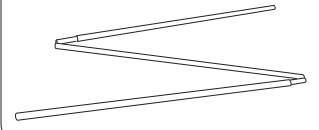

2

Assemble and fit the pole into the hole in the cannister.

Articulated Pole.

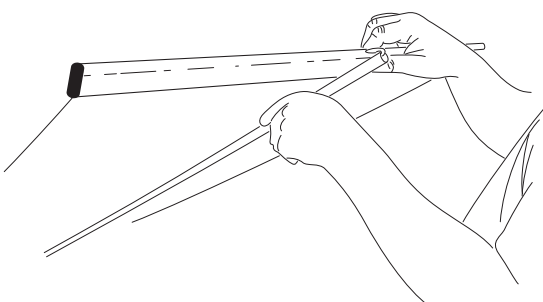

Ensure the pole locates into the holding bracket.

3

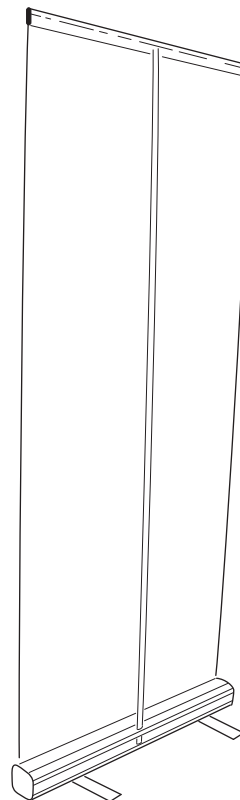

Leaning the pole backwards, extend the top rail with graphic and attach the fixing at the top of the pole.

4

5

Rear view when complete.

Important for take-down

To keep best appearance and a long service life always retract the banner into the cassette in a controlled manner.

Take care that the banner's vertical-sides are guided clear (inboard) of the cassette end caps during retraction.

Note:

Request artwork templates if required.
