Built with a GRP hull and superstructure, Arados is equipped with a semi-displacement hull that delivers outstanding seakeeping and impressive speeds. Driven by twin MTU engines, the yacht can cruise at a comfortable speed of 20 knots and reach a maximum speed of 26 knots, with a range of up to 4,000 nautical miles from its 60,000-liter fuel tanks. Additionally, the advanced stabilization system aboard the yacht minimizes the side-to-side roll, ensuring a smooth sailing experience for all guests.
