Seven Non-Surgical Cosmetic Health Advancements

There's no reason to go under the knife to find the fountain of youth. These innovations, available on the Main Line, will combat many signs of aging without invasive procedures.

BY TARA BEHAN PUBLISHED NOVEMBER 16, 2012 AT 02:43 PM

(page 1 of 2)

Liposonix

• **Treatment:** Right now, Dr. Jonathan Pontell's Aesthetic Facial Plastic Surgery Center in **Media** is the only practice in the region offering this procedure, in which high-intensity ultrasound energy is used to destroy fat cells in problem areas. The treatment lasts about an hour and is relatively pain-free.

• **Results:** After one treatment, a patient's waistline may be reduced by up to one inch. Other treatable areas include the hips, thighs and arms. Results come within eight to 12 weeks, during which time the body naturally eliminates the fat cells. Pontell has been using Liposonix on the abdomen in conjunction with Ultherapy for a non-surgical tummy tuck.

• **Side effects** (if properly administered): None.

• **Number of treatments:** Typically just one.
