

LONG-LASTING MAKEOVERS

03

AGE-DEFYING

FULLER CHEEKS

With age, the cheeks start to lose fat and sag. A cheek augmentation helped restore volume and youthful contours to this patient's face.

A FULL FACE REFRESHER

A makeover can improve your appearance and boost your self-esteem. A facelift, necklift and upper blepharoplasty created a complete transformation. Procedures performed by Brent Moelleken, MD; Beverly Hills, CA.

A SOFTER APPEARANCE

04

DEFY TIME

A facelift, forehead lift and upper eyelid blepharoplasty were performed, which helped this patient achieve a more alert and vibrant appearance.

WRINKLE REDUCER

Fat was injected into deep wrinkles like the nasolabial folds and fine lines around the corners of her mouth, which helped soften her appearance. Procedures performed by Lu-Jean Feng, MD; Cleveland, OH.

05

A REJUVENATED LOOK

FIRM THE FACE

Beyond just tightening skin, a facelift helps restore volume and reduce the signs of aging by repositioning muscles and redistributing or, in some cases, adding fat to the face, resulting in a younger appearance.

RESTORE DEFINITION

Loose neck skin and neckbands can result in a poorly defined neckline—a telltale sign of aging that can be corrected with a necklift. Procedures performed by Jonathan Pontell, MD; Media, PA.
